first published in 1988 postmodernism is a word much used and misused in a variety of disciplines including literature visual arts film architecture literary theory history and philosophy a poetics of postmodernism is neither a defense nor a denunciation of the postmodern it continues the project of hutcheon s narcissistic narrative and a theory of parody in studying formal self consciousness in art but adds to this both a historical and ideological dimension modelled on postmodern architecture postmodernism is the name given here to current cultural practices characterized by major paradoxes of form and of ideology the poetics of postmodernism offered here is drawn from these contradictions as seen in the intersecting concerns of both contemporary theory and cultural practice

postmodernism has been a buzzword in contemporary society for the last decade but how can it be defined in this very short introduction christopher butler challenges and explores the key ideas of postmodernists and their engagement with theory literature the visual arts film architecture and music he treats artists intellectuals critics and social scientists as if they were all members of a loosely constituted and quarrelsome political party a party which includes such members as cindy sherman salman rushdie jacques derrida walter abish and richard rorty creating a vastly entertaining framework in which to unravel the mysteries of the postmodern condition from the politicizing of museum culture to the cult of the politically correct about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

much of social and political thought over the last three centuries has been concerned with transgression and change with progress and a focus on creating something better than we have now but when many of these ideas are put into practice the result has been violence turmoil and human misery this we might say has been the result of grand ideals taking precedence over the interests of ordinary people this book presents an alternative view the antimodern condition this involves the rejection of change and progress and instead seeks to promote certainty permanence and settlement the antimodern condition is where we are in place and settled it is where we are part of the world around us and not at war with it it is where we accept our place we are with those who we care for and so we are theirs the antimodern condition is where we recognise that we dwell within traditions

which may evolve and change but which keep us within the bounds of what is known and what works this book takes a cross disciplinary approach integrating ideas from politics philosophy social theory and architecture to present an alternative to progress and other modern conceits
