these revealing facts form the basis for many of today's religious concepts and belief systems

the film *Zeitgeist* became an overnight internet sensation with its claims christianity was based upon a pagan solar mythology this idea developed in the eighteenth century but dismissed as ridiculous by scholars has held support among anti religious and occultic thinkers and recently was popularized by conspiracy theorists in the first of a two volume critique of these ideas *Albert McIlhenny* takes on the claims of its best known supporters by the end of this volume the theory of astrotheology is shown to be based on various historical mistakes popular in early modernity but since shown to be erroneous it is demonstrated the source of its current support is not based upon any evidence but the wild claims of conspiracy theorists dressed up to look like scholarship

this book proves there is nothing new under the sun regarding many of our modern religious beliefs this includes christianity and how many of its beliefs could be far older than what we have suspected it gives a complete run down of the stellar lunar and solar evolution of our religious systems and contains new long awaited exhaustive research on the gods and our beliefs

Neander was one of the greatest religious historians to have ever lived in this abbreviated version of a larger work he covers the current of gnostic ideas during the formation of christianity this topic is important because it outlines all of the competitive beliefs that were at work at the time and how they affected the christian struggle in both good and bad ways this rare book may cause one to never look at christianity in quite the same way again due to its immense scholarship and interesting array of facts
