the college instructor's guide to writing test items measuring student learning addresses the need for direct and clear guidance on item writing for assessing broad ranges of content in many fields by focusing on multiple choice response items this book provides college instructors the tools to understand develop and use assessment activities in classrooms in a way that consistently supports learning including dozens of example items and additional resources to support the item development process this volume is unique in its practical focus and is essential reading for instructors and soon to be educators professional development specialists and higher education researchers as teaching assessment and learning are inherently intertwined the college instructor's guide to writing test items both facilitates the development of instructors own practice and improves the learning outcomes and success of students

rev ed of pharmacology 9th ed c2002

this first volume is but an introduction to the growing use of computer based systems in health science education it is unlikely that the intellectual or applied system constructs herein are either exhaustive of the field or immutable growth is inevitable for one thing the field is still fractured and loosely organized which is an inevitable description of an adolescent science in a rich mine of ideas there is emerging however an organizing concept a short look into the future indicates that educational system design will be dominated by a concept which for want of a better term we may call an information system actually this term de rives from an early new york world's fair exhibition designed by charles eames entitled the informational machine in which the designer illustrated once again his insight into the future by showing how in a fundamental manner the digital computer promised to affect and to change our lives and this change is by no means completed even during the publication of this volume the basic sciences re quisite to the development of an information machine have evolved significantly the three intellectual areas to watch are developments in artificial intelligence graphics and man machine interaction and basic component and computer system design
