from the foreword umberto quattrocchi has brought us some amazing and useful works through the various dictionaries that he has compiled this time it is for two very important plant families the palms and the cycads that are synthesized here in these two volumes each entry is fascinating not just for the botany and full nomenclature of the plant species but for all the associated uses folklore and interactions with other organisms these entries are fascinating glimpses of natural history botanists conservationists ethnobotanists anthropologists geographers bird watchers naturalists historians and those of many other disciplines will find these volumes a most valuable and useful resource it is the sort of book that will be in frequent use in my library professor sir ghillean prance frs vmh former director royal botanic gardens kew following the same format as umberto quattrocchi s highly praised and well used previous works the crc world dictionary of palms common names scientific names eponyms synonyms and etymology brings together the vast and scattered literature on palms and cycads to provide better access to information on these

economically important plants each genus and species has a detailed morphological description and includes a list of synonyms and vernacular names in many languages bibliographies accompany each entry which are comprehensive up to date and multi lingual the detailed information for every entry on habitats economic uses historical and biographical data botanical exploration and linguistics will be useful for any library involved with botany herbal medicine pharmacognosy medicinal and natural product chemistry ecology ethnobotany systematics general plant science agriculture or horticulture umberto quattrocchi is the author of the bestselling crc world dictionary of plant names winner of the prestigious hanbury botanical garden award his most recent multi volume work crc world dictionary of medicinal and poisonous plants received strong praise as being an unparalleled starting place a tool of first resort for any thoughtful researcher quattrocchi and crc have delivered a dictionary like no other a learned finger pointing in the right direction john de la parra northeastern university boston massachusetts usa from economic botany vol 68 2014

does the diagnosis of irreversible destruction of both forests and their biodiversity actually mask a wide range of patterns based on the results of natural and social scientists this book attempts to answer fundamental questions such as what is deforestation and how do we measure it what changes result from deforestation and how do human societies manage these changes it explores the many and varied aspects of deforestation a process whose effects are not always as negative as perceived

this book provides an overview of beach management tools including carrying capacity beach nourishment environmental and tourism awards like blue flag or others bathing water quality zoning beach typologies quality index user s perception interdisciplinary beach monitoring coastal legislation shore protection social and economic indicators ecosystem services and coastal governance applied in beach case studies beaches are one of the most intensely used coastal ecosystems and are responsible for more than half of all global tourism revenues and as such the book introduces a wide range of state of the art tools that can be used to deal with a variety of beach challenges each chapter features specific types of tools that can be applied to advantage in beach management practices with examples of local and regional case studies from around the globe this is a valuable resource for anyone involved in beach management

this book presents the updated results of an investigation carried out in 2019 the national autonomous university of mexico s unam climate change research program pincc funded the research coordinated by armelle gouritin the research aims to answer the following questions does the mexican legal framework and public policies address forced internal climate mobility if not what could be the elements of a legal framework and public policies to address the phenomenon as the phenomenon was approached it was clear that it was extremely complex and consisted of numerous tensions that would lead to other questions throughout the research process climate forced internal displacement is projected as a huge scale phenomenon in mexico

against this background the book provides the first critical diagnosis of the current politico legal mexican framework and finds it to be lagging behind in terms of prevention and attention the book analyses the three level mexican governance federal state and local levels and identifies serious loopholes according to a rights based approach that particularly focuses on women indigenous peoples and persons and communities with scarce economic resources the results provide information on up coming legislative and political processes and provide benchmarks that can be applied in other case studies including other national frameworks critical analysis

encyclopedia of the world's biomes is a unique five volume reference that provides a global synthesis of biomes including the latest science all of the book's chapters follow a common thematic order that spans biodiversity importance principal anthropogenic stressors and trends changing climatic conditions and conservation strategies for maintaining biomes in an increasingly human dominated world this work is a one stop shop that gives users access to up to date informative articles that go deeper in content than any currently available publication offers students and researchers a one stop shop for information currently only available in scattered or non technical sources authored and edited by top scientists in the field concisely written to guide the reader though the topic includes meaningful illustrations and suggests further reading for those needing more specific information

the earth as transformed by human action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world the purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes the first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action the final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere

includes entries for maps and atlases
