ebook introduction to financial accounting 9e

this book introduces corporate financial management based on the basic capital budgeting framework and the time value of money it focuses on theoretical formulations and correct application of financial techniques that will help improve managerial and financial decisions based on fundamental principles of accounting and finance like time value of money and after tax it introduces readers to real world constraints and complexities in the two fields written in a simple and accessible manner it can be read by students of finance and accounting courses business professionals and general public alike

this book discusses recent developments relating to ethical and sustainable issues in

accounting finance accounting is often seen as a technical discipline that records classifies and reports financial transactions however since the financial information produced concerns all interest groups both within and outside the enterprise accounting also has social characteristics and involves multi faceted duties and responsibilities as such in addition to basic principles and accepted rules and standards in the field this book focuses on the ethical aspects and fundamentals of this profession that accountants should also take into consideration as this is the only way to build and preserve society's confidence in accounting and increase its social credibility

based on a study covering a one year financial reporting cycle at a commercial subsidiary of a well known scientific research organization inside accounting examines how accountants and non accounting managers construct their company's earnings addressing issues in both internal management accounting such as budgeting performance evaluation and control as well as external financial accounting such as book keeping monthly year end accounts and auditing david leung focuses on how people classify transactions make professional judgments and use computer software for accounting and prepare for and facilitate the auditing process he also looks at accountancy training and the impact of people's affiliations to the accounting profession or other professions on their accounting and on their perceptions of financial statements other contingent or contextual factors that influence the choice of accounting method such as time pressure reward structures management authority and institutions are also considered david leung's research employs an innovative blend of theory and practice that redresses the imbalance between ethnographic studies of financial accounting and management accounting and helps close the gap between the academic curriculum and the experiences of practitioners his research leads the author to conclude that no act of accounting classification is ever indefeasibly correct that the accounting community's institutions and authority are central to the accounting process and to the truth and fairness of accounting numbers that accounting training involves extensive use of learning by doing and that both accountants and non accounting managers have goals and interests that often result in no better than good enough accounting this book will appeal to accounting and finance professionals and academics in finance as well as to sociologists and academic researchers interested in research methods and science studies

corporate financial accounting and reporting is a comprehensive accounting textbook directed at those using financial reports its aim is to help current and future managers gain a thorough understanding of companies published reports and is unique in the fact that it covers all three years of a traditional financial accounting course the text is divided into 3 parts the first covers the foundations of accounting the second part considers the components of financial statements in more depth and the third part explores how investors analyse financial statements recognising the increasingly international nature of accounting this book provides full coverage of international accounting standards with the european union's company law directives providing its legal framework corporate financial accounting and reporting is designed for international mba programmes and specialist postgraduate programmes in international business finance in europe it can also be used in international business programmes at the undergraduate level
