one hundred years ago electric cars were the most popular automobiles in the world in the late
nineteenth century and at the start of the twentieth century they outsold every other type of car and
yet within a couple of decades of the start of the twentieth century the electric car had vanished
thousands of battery powered cars disappeared from the streets replaced by the internal combustion
engine and their place in the history of the automobile was quietly erased a century later electric cars
are making a comeback fears over pollution and global warming have forced manufacturers to
reconsider the electric concept a history of electric cars presents for the first time the full story of
electric cars and their hybrid cousins it examines how and why electric cars failed the first time and
why today s car manufacturerers must learn the lessons of the past if they are to avoid repeating

previous mistakes all over again the book examines in detail early vehicles such as the lohner porsche petrol electric hybrid of 1901 key figures in the history of the electric car development such as henry ford sir clive sinclair s plans to build a number of electric vehicles designed to sit alongside the sinclair c5 the return of the electric technology to vehicles as diverse as the nasa lunar rover commuting vehicles and supercars future developments in electric cars for the first time the full story of electric cars and their hybrids are examined the hidden past of the electric automobile is uncovered and its future developments are discussed superbly illustrated with 300 colour photographs many of which are rare and original sketch designs nigel burton has written and lectured on cars and automotive history for more than twenty years

this book constitutes the refereed proceedings of the first international conference on applied cryptography and network security acns 2003 held in kunming china in october 2003 the 32 revised full papers presented were carefully reviewed and selected from a total of 191 submissions the papers are organized in topical sections on cryptographic applications intrusion detection cryptographic algorithms digital signatures security modeling security security protocols cryptanalysis key management and efficient implementations

there are many books available in the market on the proposed topic but none of them can be termed as comprehensive besides students face many problems in understanding the language of this books keeping these points in mind artificial intelligence was prepared which should be simple enough to comprehend and comprehensive enough to encompass all the topics of different institutions and universities
