to differentiate this we must use the chain rule this is because we have two functions multiplied by each other $x \sin x$ we use the substitution $u = \sin x$

how to differentiate a bracket raised to a power i e chain rule lets say the equation to be differentiated takes the following format $y = ax^2 + bx + c$ n to find $\frac{dy}{dx}$ 1 make u equal the contents of the

chain rule when we have a function on its own raised to a certain power eg $f(x) = x^3$ $f(x) = x^3$ $f(x) = x^3$ product rule when we have 2 functions or more u

we use the chain rule when differentiating a function of a function like $f(g(x))$ in general we use the product rule when differentiating two

functions multiplied together like $f(x) \cdot g(x)$ in general

the chain rule is also used when you want to differentiate a function inside of another function for example you would use it to differentiate $\sin(3x)$ with the function $3x$ being inside the \sin function

if y is a function of u which itself is a function of x then $\frac{dy}{dx} = \frac{dy}{du} \cdot \frac{du}{dx}$ differentiate the outer function and multiply by the derivative of the inner function to illustrate this rule look at the example

in order to differentiate this we need to use the chain rule first let $u = ax + b$ then differentiating $\frac{du}{dx} = a$ by substituting into the original expression we can obtain $y = u^n$ differentiating that gives

how to differentiate using the chain rule the chain rule is a rule of differentiation that states $\frac{d}{dx} f(g(x)) = f'(g(x)) \cdot g'(x)$ in effect the chain rule allows us to split up a complicated equation into smaller more

the chain rule is used for functions inside other functions we have learnt to differentiate functions like x^2 , y^2 , e^x , $\sin(x)$ and we will use these results in the chain rule

integrating $\cos(2x)$ is simply a matter of reversing the chain rule so the result of this integration is $\frac{\sin(2x)}{2}$ finally we multiply this by $\frac{1}{2}$ the constant we took outside the integral before to give
