the evolution of human beings has been shaped to a large extent by microbes
a number of microbes are innocuous or even contribute to our health
equilibrium this is the case of bacteria and viral phages present in our gut
however several bacteria viruses parasites and fungi are damaging our bodies
causing a number of acute and chronic diseases until recently these bugs
represented the main causes of death better hygiene vaccines antibiotics and
other anti microbial drugs have resulted in a better control or cure of many
infections however malaria tuberculosis and aids still represent major threats
in several countries and the recent epidemics of ebola and zika demonstrate
how vulnerable we are to newly emerging viruses furthermore diarrhea and
pneumonia caused by bacteria or viruses still kill millions of children worldwide
most importantly bacteria resistant to existing antibiotics are multiplying at a
high pace and these superbugs are expected to kill more and more people in
the coming years clearly we need to develop more effective approaches to
tackle bugs and superbugs better hygiene and better vaccine coverage must
be considered first and education of kids is essential in this respect this is the
main objective of this series of papers published in frontiers for young minds
under the heading how to fight harmful microbial bugs and superbugs another
key objective of the collection is to elicit the interest of children for research on

innovative anti microbial therapies and vaccines
