basic sciences for obstetrics and gynaecology has become the standard revision aid for students preparing for examinations in obstetrics and gynaecology particularly those candidates for the mrcog part i a wealth of information is presented in a concise didactic format focusing on those facts that are generally considered to be neither contentious nor speculative the fifth edition has been substantially updated to reflect the current understanding of the basic sciences underpinning the practice of obstetrics and gynaecology this book will also be of value to professionals wishing to refresh their basic scientific knowledge cell biology embryology and the placenta anatomy general physiology and biochemistry endocrinology pathology microbiology pharmacology tim chard is professor of obstetrics and gynaecology at st bartholomew s hospital in london richard lilford is professor of health services research at the university of birmingham

this textbook takes a new dynamic approach to the basic sciences in obstetrics and gynaecology it teaches candidates all they need to know for the mrcog part 1 examination by extending the understanding of the basic medical sciences and their relevance to obstetrics and gynaecology like conventional textbooks it teaches what is true but it also what is false and why the most complex concepts are discussed in a problem based format so that the relevant basic sciences are taught and drawn together in context

the aim of this book is to provide a straightforward summary of the knowledge required for preliminary examinations in specialist obstetrics and gynaecology the first part of the examination for membership of the royal college of obstetricians and gynaecologists would be a good example thus the field covered is that of the basic sciences anatomy physiology biochemistry etc as applied to human reproduction most examinations of this type are based on multiple choice questions mcq no apology is made for the fact that the present book addresses the sort of fact which lends itself to testing by this approach there is no discussion of speculative or contentious areas no account of present or future research and no references excellent books are available which treat the topic in a much fuller and more discursive manner and the present volume does not seek to emulate them readers will be aware that even apparently immutable facts are subject to occasional revision we have attempted to present the state of the art most of the material is generally if not universally accepted a particular problem arises with numerical information

basic science in obstetrics and gynaecology is an essential one stop portable revision tool for candidates preparing for part 1 of the mrcog specialist examination fully updated by experts who are

internationally recognised in their fields the chapters match the syllabus of the exam combining detailed coverage of the science with related self assessment questions that you will encounter in the mrcog this book is suitable for doctors specialising in obstetrics and gynaecology who want the best chance possible to pass this difficult exam covers all topics for the mrcog part 1 including basic science and clinical anatomy contains self assessment sba questions to consolidate learning includes three mock exam papers enabling you to practice for the exam digital version included fully revised and updated completely updated self assessment chapter written in the style of the new exam extensive revision of fetal physiology biophysics biochemistry endocrinology and physiology new top quality illustrations to support learning
