This introduction to the history of work in America illuminates the many important roles that men and women of all backgrounds have played in the formation of the United States. A day in the life of an American worker 200 trades and professions through history allows readers to imagine the daily lives of ordinary workers from the beginnings of colonial America to the present. It presents the stories of millions of Americans from the enslaved field hands in antebellum America to the astronauts of the modern space age as they contributed to the formation of the modern and culturally diverse United States. Readers will learn about individual occupations and discover the untold histories of those women and men who too often have remained anonymous to historians but whose stories are just as important as those of leaders whose lives we study in our classrooms. This book provides specific details to enable comprehensive understanding of the benefits and downsides of each trade and profession discussed. Selected accompanying documents further bring history to life by offering vivid testimonies from people who actually worked in these occupations or interacted with those in that field.

Manufacturing industry is one of the most important sectors that contribute significantly to the economy of Malaysia. More than half a million workers in Malaysia work in this industry and many of them are exposed to loud noises of more than 85dB that is harmful to health. Noise induced hearing loss (NIHL) is the highest reported occupational disease affecting around 16% of workers globally. In this book we reported a study conducted in 26 manufacturing industries that employed around 270,000 workers with more than 40% of them were exposed to noises that potentially cause NIHL. This cross sectional study designed with face to face interviews using questionnaires conducted among occupational safety and health practitioners and workers selected from these industries. Direct and indirect cost was imputed

component covering cost of medical care and rehabilitation transportation loss of productive time and investigations costing data in the government hospital was obtained from casemix information system from a tertiary teaching hospital the study confirmed that nihi among workers in manufacturing industry imposed a huge economic burden for malaysia in order to mitigate this problem the existing and yet out dated noise regulation need to be reviewed meanwhile employers need to implement hearing conservation program more effectively
