from the back cover studio time is expensive unfortunately most glassblowing students still learn through a combination of apprenticeship and observation a slow and inefficient method the art of fire teaches you quickly how to manipulate the glass through a series of structured lessons and exercises including safety exercises to prevent burns over 500 photographs and illustrations step by step instruction for all basic techniques fixes for more than 50 common

problems

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

glass blowing glassblowing is the artwork of shaping molten glass using blowing air into it via a lengthy steel tube glass is composed of a range of materials the most frequent sorts used these days are lead crystal and soda lime glass lead crystal most normally used for blowing is made from a combination of silica sand 24 lead oxide small quantities of chemical substances like potash and a cullet crushed waste glass soda lime glass is made from sand and soda lime and is the most frequent form of family glassware observed today
