historians of colonial africa have largely regarded the decade of the great depression as a period of intense exploitation and colonial inactivity in colonial meltdown moles o chonu challenges this conventional interpretation by mapping the determined at times violent yet instructive responses of northern nigeria s chiefs farmers laborers artisans women traders and embryonic elites to the british colonial mismanagement of the great depression colonial meltdown explores the unraveling of british colonial power at a moment of global economic crisis o chonu shows that the economic downturn made colonial exploitation all but impossible and that this dearth of profits and surpluses frustrated the colonial administration which then authorized a brutal regime of grassroots exactions and invasive intrusions the outcomes were as harsh for northern nigerians as those of colonial exploitation in boom years northern nigerians confronted colonial economic recovery measures and their agents with a variety of strategies colonial meltdown analyzes how farmers women laborers laid off tin miners and northern nigeria s emergent elite challenged and rebelled against colonial economic recovery schemes with evasive trickery defiance strategic acts of revenge and criminal self help and in the process exposed the weak underbelly of the colonial system combined with the economic and political paralysis of colonial bureaucrats in the face of crisis these african responses underlined the fundamental weakness of the colonial state the brittleness of its economic mission and the limits of colonial coercion and violence this atmosphere of colonial collapse emboldened critics of colonial policies who went on to craft the rhetorical terms on which the anticolonial struggle of the post world war ii period was fought out in the current climate of global economic anxieties o chonu s analysis will enrich discussions on the transnational ramifications of economic downturns it will also challenge the pervasive narrative of imperial economic success

the modern world is in the authors view undergoing the process of meltdown global meltdown having argued in an earlier book that humankind is headed for an environmental catastrophe that will either eliminate the human species or greatly reduce our numbers the authors now focus on the breakdown of organized social order that will occur when the ecological crisis happens believing that civilization as we know it will not last even without a definitive environmental cataclysm they explore here the social political and philosophical ramifications of this vision after outlining the interaction of the forces of environmental destruction economic rationalism and technological revolution this book shows their impact on social problems such as immigration racial and ethnic conflict and the loss of personal spiritual and religious meaning in the first chapter the authors consider the effects of these social conflicts in both the non western and the western world concluding that the global meltdown theory is supported by the worldwide rise of terrorism chapter 2 discusses the technological and ecological forces they believe will lead to a new world disorder the work then goes on to use australia as a case study illustrating the collision of population and environment in the concluding chapter the authors support their thesis further with a review of the literature on the subject

america s defense meltdown pentagon reform for president obama and the new congress describes how america s armed forces are manned and equipped to fight at best enemies that do not now and may never again exist and to combat real enemies ineffectively at high human and material cost given that many regard america s military as the best in the world how can this be in answer to this question 13 non partisan pentagon insiders retired military officers and defense specialists lay out an array of hard hitting and well documented charges against our current defense establishment they demonstrate that the hugely expensive and excessively complex

weapons embraced by the pentagon and congress as vital for our national defense are barely adequate for engaging in outmoded 20th century forms of warfare they are woefully inadequate for fighting a 21st century fourth generation war as we've learned so painfully in iraq and afghanistan at least as disturbing is the condition of the us defense budget over time policy makers of all political stripes have created budgets that have made our forces smaller less well equipped and less ready to fight all at dramatically increasing cost fortunately the book's authors offer real world solutions to all the problems they identify at the same time however they remain pessimistic about the prospects for real change arguing that in a system that measures merit by the amount of money spent the reform proposals elaborated in this book are likely to meet intense resistance as winslow wheeler remarks the changes require a president with an iron will who will require real not cosmetic reforms of a system determined to and skilled at countering them it will also require a president who will stick with the process for years continuously making decisions that will ultimately reverse the present disastrous course u s national security is now on
