in may 1998 india and pakistan put to rest years of speculation as to whether they possessed nuclear technology and openly tested their weapons some believed nuclearization would stabilize south asia others prophesized disaster authors of two of the most comprehensive books on south asia s new nuclear era Šumit ganguly and s paul kapur offer competing theories on the transformation of the region and what these patterns mean for the world s next proliferators ganguly begins with an outcome based approach emphasizing the results of militarized conflict in his opinion nuclear weapons have prevented indo pakistani disputes from blossoming into full scale war kapur counters with a process based approach stressing the specific pathways that lead to conflict and escalation from his perspective nuclear weapons have fueled a violent cycle of pakistani provocation and indian response giving rise to

a number of crises that might easily have spun into chaos kapur thus believes nuclear weapons have been a destabilizing force in south asia and could similarly affect other parts of the world with these two major interpretations ganguly and kapur tackle all sides of an urgent issue that has profound regional and global consequences sure to spark discussion and debate india pakistan and the bomb thoroughly maps the potential impact of nuclear proliferation

comprehensive account of india s relations with the outside world

this volume first published in 2005 analyses the persistence of the india pakistan rivalry since 1947

since their emergence as independent states from the british colonial empire india and pakistan have gone to war four times a detailed explanation of the indo pak conflict has been laid out in this book that attributes it to three distinct components the first is the divergent ideological commitments of the nationalist elites in the india and pakistan anti colonial movements the second component is pakistan s irredentist claim to kashmir the final component lies in the opportunistic events that act as immediate precipitants to war in the region

the escalating tensions between india and pakistan have received renewed attention of late since their genesis in 1947 the nations of india and pakistan have been locked in a seemingly endless spiral of hostility over the disputed territory of kashmir ganguly asserts that the two nations remain mired in conflict due to inherent features of their nationalist agendas indian nationalist leadership chose to hold on to this muslim majority state to prove that minorities could thrive in a plural secular polity pakistani nationalists argued with equal force that they could not part with kashmir as part of the homeland created for the muslims of south asia ganguly authoritatively analyzes why hostility persists even after the dissipation of the pristine ideological visions of the two states and discusses their dual path to overt acquisition of nuclear weapons as well as the current prospects for war and peace in the region

the response to the first three volumes released two and a half years ago was so impressive that it has been decided to release this fourth volume this volume has been brought out at a time when the bilateral relations between india and pakistan are improving fast the volume includes articles by the experts from both india and pakistan on the subject as well as important documents the volume also includes some documents relating to the period before the publication of three volumes because these were not available at that time it is hoped that the book would be found useful by the students and research scholars of india and pakistan concerned with international relations the volume would also be useful to the parliamentarians and executives of india and pakistan concerned with the formulation and execution of foreign policy of their respective country even the common readers interested in indo pak relations would find the volumes useful informative and interesting

this volume represents a comprehensive and detailed case study of the long running conflict between india and pakistan primarily over the contested territory of kashmir and the involvement of the united states within that conflict the book details the history of partition the critical event in the modern history of the subcontinent and the fundamental catalyst for the enduring rivalry between india and pakistan it provides a summary description and analysis of the characteristics demographic social cultural political economic and military of the three primary actors that are party to the conflict the sovereign states of india and pakistan and the territory of kashmir it explains the history of us policy toward india and pakistan as individual countries as well as us policy toward the conflict between them particularly in light of the indian and pakistani nuclear tests of 1998 and events since september 11 2001 in addition the volume also describes and analyzes the involvement of three other major extra regional actors

the rivalry between india and pakistan has proven to be one of the world s most intractable international conflicts ever since 1947 when the british botched their departure from the south asian subcontinent and the enmity is likely to continue for another thirty five years reaching the century mark this has critical implications for both countries and the rest of the world renowned south asia expert stephen p cohen explains why he expects this rivalry to continue in this first comprehensive survey of the deep historical cultural and strategic differences that underpin the hostility in recent years the stakes have increased as india and pakistan have each acquired a hundred or more nuclear weapons blundered into several serious crises

and become victims of terrorism some of it from across their borders america is puzzled by the problem of dealing with a rising india and a struggling pakistan and cohen offers a fresh approach for u s policy in dealing with these two powers drawing on his rich experience in south asia to explore the character depth and origin of indian and pakistani attitudes toward each other cohen develops a comprehensive theory of why the dispute between new delhi and islamabad is likely to persist he also describes the terrible cost of this animosity for the citizens of india and pakistan including the region s high levels of violence and low level of economic integration on a more hopeful note however he goes on to suggest developments that could ameliorate the tension including a more active role for the unitedstates in addressing a range of issues that divide the nations kashmir is one of these issues but as much a consequence as a cause of the rivalry can india and pakistan resolve their many territorial and identity issues perhaps the best they can expect in the near term is a limited degree of normalization including bottom up ideas generated by the peace and business communities as well as a realistic assessment by strategic elites of the two states shared common interests right now full normalization seems unlikely cohen writes in the preface so this book is suffused with conditional pessimism normalization would be desirable but there are worse futures than a projection of the present rivalry for another thirty years or more

a fresh unconventional look at the early post partition years suggesting that cooperation rather than conflict was the order of the day between india and pakistan

India Pakistan and Bangladesh share a long history an emerging cordial and a common vision for the future this book is not India centric but deals with various aspects of all the three sovereign nations reading them together will be an unprecedented experience rarely attempted before it has rarely happened in the modern world how these three nations who geographically one but culturally so different are chalking out an independent place in the comity of nations at times with the help of each other and at another on its own merit and inherent strength it is not written from any biased perspective in fact it explains people places and events from a neutral world view it is ideally an international venture that would benefit historians teachers and students in the entire sub continent it will be interesting to compare the three countries from different parameters thus planning a wholesome picture the encyclopedia aims at clearing confusions and contradiction that have crept in because of certain vested interests and it should be read from a neutral benchmark these volumes very clearly and earlier suggest how fatal the disintegrate have proven to these nations with the fact that divided these countries have in actuality fallen in the face of achieving the target of universal supremacy
