this is the definitive permaculture design manual in print since 1988 it is the textbook and curriculum for the 72 hour certificate course in permaculture design written for teachers students and designers it follows on and greatly enlarges on the initial introductory texts permaculture one 1978 and permaculture two 1979 both of which are still in demand very little of the material found in this book is reproduced from the former texts it covers design methodologies and strategies for both urban and rural applications describing property

design and natural farming techniques publisher

in spite of its tough message there is much compassion and humanity in the final empire right away as you begin to read this work you sense increasingly the grand perspective in kötke s words he is not speaking of anarchy he is offering vital common sense it s just that his meaning is so unavoidably political and so much against what we have been taught all our lives the materialistic values of civilization teach us that the accumulation of wealth is progress the material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna the ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils the simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments this amounts to a direct challenge to humankind a demand for radical change a re envisioning of our part in the community of life and the precepts of individuality and mr kötke provides a strong argument for this case he traces the environmental scars of civilization through the ages empire after empire desertification of the top soil winds its way around the globe in an erosive helix from china to india to mesopotamia to italy to north america as radical as it may seem at first glance the final empire is a necessary and sensible primer for the recovery of the planet it blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of earth dan armstrong author of the novels prairie fire and taming the dragon

once patronized primarily by the counterculture and the health food establishment the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological issues assumed by many to be a recent phenomenon that industry owes much to agricultural innovations that go back to the dust bowl era this book explores the roots and branches of alternative agricultural ideas in twentieth century america showing how ecological thought has challenged and changed agricultural theory practice and policy from the 1930s to the present it introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a strong advocacy of economic justice for

farmers Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental movement in the United States as family farms failed during the depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming in chronicling the overlooked history of alternative agriculture a green and permanent land records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa and by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought
