conventional thinking teaches that the absence of liability in particular contractual invalidity is itself the reason for the restitution of transfers in the south african law of unjustified enrichment however this book argues that while the absence of a relationship of indebtedness is a necessary condition for restitution in such cases it is not a sufficient condition the book takes as its focus those instances in which the invalidity thesis is strongest namely those traditionally classified as instances of the *condictio indebiti* the claim to recover undue transfers it seeks to demonstrate that in all such instances it is

necessary for the plaintiff to show not only the absence of his liability to transfer but also a specific reason for restitution such as mistake compulsion or incapacity furthermore this book explores the reasons for the rise of unjust factors in south african law attributing this development in part to the influence of the roman dutch restitutio in integrum an extraordinary equitable remedy that has historically operated independently of the established enrichment remedies of the civilian tradition and which even now remains imperfectly integrated into the substantive law of enrichment finally the book seeks to defend in principled terms the mixed approach to enrichment by transfer an approach based both on unjust factors and on the absence of a legal ground which appears to characterise modern south african law it advocates the rationalisation of the causes of action comprised within the condictio indebiti many of which are subject to additional historically determined requirements in light of this mixed analysis
