l università autonoma dei bambini è un innovativo approccio psicopedagogico al bambino partendo dall asserzione di einstein per cui l immaginazione è più che la conoscenza osserviamo come ogni prodotto della conoscenza sia artistica che scientifica sia costituito prima nella sfera immaginativa e solo in un secondo tempo in quella razionale l immaginazione può essere dunque considerata come un vetro magico con una doppia funzione una finestra volta verso l esteriorità conoscitiva e uno specchio rivolto verso l interiorità del bambino di conseguenza ogni atto conoscitivo è un atto psicologico e quindi intrinsecamente psicoterapeutico da ciò deriva una nuova forma di psicopedagogia e psicoterapia dove la conoscenza di sé avviene attraverso l acquisizione dei simboli e dei significati delle discipline umanistiche scientifiche e artistiche rielaborate in chiave psicologica presentate nelle nostre facoltà universitarie
