this is the first attempt to understand the broad scope of the ussr's offensive biological weapons research from its inception in the 1920s gorbachev tried to end the program but the us and uk never obtained clear evidence he succeeded raising the question whether the means for waging biological warfare could be revived in russia in the future

in 2006 the cumulative cost growth in dod's portfolio of 96 major defense acquisition programs was 296 billion and the average delay in delivering promised capabilities to the warfighter was 22 months these are very poor outcomes the auditor has used metrics to review the mgmt and health of these programs from within the framework of best practices this testimony discusses 1 knowledge metrics used to determine how well programs manage tech design and manufacturing risks 2 outcome metrics concerning cost schedule and capability that serve as health indicators of how well programs are being executed in terms of predicted outcomes and 3 the prerequisites that must be met in order for a program's plans and goals to be realistic

nonproliferation issues for weapons of mass destruction provides an understanding of wmd proliferation

risks by bridging complex technical and political issues the text begins by defining the world conditions that foster proliferation followed by an analysis of characteristics of various classes of wmds including nuclear biological and chemical

this reference work is an ideal resource for anyone interested in better understanding the controversial iraq war it treats the war in its entirety covering politics religion and history as well as military issues the iraq war started in 2003 in a quest to rid the nation of weapons of mass destruction wmds that were never found it lasted over 8 years during which more than 30 000 u s service members were wounded and almost 4 500 american lives lost comprised of some 275 entries this comprehensive encyclopedia examines the war from multiple points of view each article is written by an expert with specialized knowledge of the topic the reference covers every aspect of the iraq war from the u s invasion operation iraqi freedom through the rise of al qaeda in iraq the surge and the u s withdrawal other significant aspects of the conflict are addressed as well including abu ghraib wmds the controversial use of private military contractors and britain s role in the war the book also features an overview essay a causes and consequences essay maps photos a chronology and a bibliography

grunden s analysis of this fundamental flaw in the japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of world war ii comparing the science and weapons programs of all the major combatants he demonstrates that japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries in the end japan could not overcome these obstacles and thus failed to make the transition to the kind of big science it needed to ward off its enemies and dominate the far east book jacket

this special issue examines the factors that are likely to shape nuclear weapons proliferation over the next decade

for this new edition louis fisher has updated his arguments to include critiques of the clinton bush presidencies particularly the use of force act the iraq resolution of 2002 the preemption doctrine of the current u s administration the order authorizing military tribunals

charting trends in american public opinion about big government from the 1930s to 1989 with emphasis on the last twenty five years they trace how we have adapted to a growing national government they analyze what these opinions tell us about changing themes in american political culture and document the significant differences in public opinion about big government the positive state and citizen s obligations

this first historical study of u s budget policy covering the last three decades places the budget at the center of modern american politics and adds an important dimension to the understanding of recent events

in this volume koistinen examines war planning and mobilizing in an era of rapid industrialization and reveals how economic mobilization for defense and war is shaped at the national level by the interaction of political economic and military institutions and by increasingly powerful and expensive weaponry

in 1950 main street american was abruptly traumatized the sudden prospect of thermonuclear war with the soviet union senator mccarthy s vicious anticommunist crusade and the beginning of the korean war all combined to dampen the public mood the cold war invaded every home rose maintains that 1950 was a pivotal year for the nation he argues that the convergence of korea mccarthy and the bomb wounded the nation in ways from which we ve never fully recovered brimming with originality this book makes readers look at the cold war from a dozen different angles
