updated 4th edition full color this text will help you learn about the periodic table the structures of atoms and molecules and the different ways atoms bond you will also learn about chemical reactions biochemistry and explore many applications of chemistry today including medicine farming fireworks and rocket fuel fun hands on activities include making goop homemade perfume and testing for acids and bases 35 lessons full color

atoms and molecules are the basic building blocks of matter matter is every physical thing around us in the universe including our own bodies in explore atoms and molecules with 25 great projects readers ages 7 to 10 investigate the structure of atoms and learn how atoms fit together to form molecules and materials if everything is made out of atoms and molecules why do people look different from dogs and doorknobs in explore atoms and molecules readers discover that the characteristics of a material are determined by the way the atoms and molecules connect and study how chemical reactions change these connections to create everything we know this book discusses the elements on the periodic table and why they are grouped into families encouraging the exploration of meaningful classification systems states of matter and mixtures and compounds round out the exploration of atoms and molecules this book supports the maker movement with lots of hands on activities that illuminate the concepts of chemistry readers build 3 d models of molecules and create a periodic table guessing game fascinating sidebars offer opportunities for readers to connect the text with real world science and cartoon illustrations provide a fun foundation for learning

this unique book of real chemistry and science for children illustrates the nature of physical and chemical change using the very smallest parts of things atoms and molecules it encourages children ages 5 12 along with their parents or teachers to become active learners of science to discover meaning not only in the ideas and definitions of others but also and especially in their own world chapters include evaporating condensing dissolving crystallizing mixing separating melting freezing and reacting

young readers will be amazed to learn about the tiny particles that make up everything in the world around them colorful illustrations and fun fact boxes will help readers understand how atoms come together to form molecules the building blocks of everything in the universe

chemistry experiments for home or school demonstrate the properties and behavior of various kinds of atoms and molecules

do your students wait until the last minute to get started on science projects no problem each experiment in this resource follows the scientific method and can be completed in an hour or less readers will model a chemical reaction discover how small a molecule is and find out what happens when atoms jump from one molecule to another most experiments also include ideas for science fair projects in case your readers have extra time

has your child ever wondered what things are made of designed for grades k 5 and to be done at home or with small groups this interactive multi activity mini course introduces children to the world of molecules and how different types of molecules are all around us the mini course includes a richly illustrated story based lesson as well as games activities and projects that appeal to all types of learners after a fun introduction to molecules through a story about ellie the electron and her cousin sam children construct their own molecule models using cutouts included in the mini course children then reinforce their understanding of how molecules are formed through an electron match card game for children who like to move around a movement based game then lets them become part of a molecule themselves along with friends or stuffed animals finally kids get to learn how new molecules are made through chemical reactions in a series of safe and easy experiments they can perform at home most materials needed to complete the mini course can be cut from the book itself or if preferred downloaded and printed using an included link the mini course requires only a few common household items to complete the activities paper scissors tape calcium carbonate chalk white vinegar string or yarn popsicle sticks eggshells and a small bowl or cup upon completing the mini course children will be provided with links to additional online resources and will earn new concept badges for their science tool kit included in the mini course including molecule electron covalent bond and chemical reaction
