from one of america's best known biologists a revolutionary new way of thinking about evolution that shows why in light of our origins humans are still special edward j larson pulitzer prize winning author of evolution once we had a special place in the hierarchy of life on earth a place confirmed by the literature and traditions of every human tribe but then the theory of evolution arrived to shake the tree of human understanding to its roots to many of the most passionate advocates for darwin's theory we are just one species among multitudes no more significant than any other even our minds are not our own they tell us but living machines programmed for nothing but survival and reproduction in the human instinct brown university biologist kenneth r miller confronts both lay and professional misconceptions about evolution publishers weekly starred review showing that while evolution explains how our bodies and brains were shaped that heritage does not limit or predetermine human behavior in fact miller argues in this highly recommended forbes work that it is only thanks to evolution that we have the power to shape our destiny equal parts natural science and philosophy the human instinct makes an absorbing lucid and engaging case that it was evolution that gave us our humanity ursula goodenough professor of biology at washington university in st louis

at the dawn of the last century leading scientists and politicians giddily predicted that science especially darwinian biology would supply solutions to all the intractable problems of american society from crime to poverty to sexual maladjustment instead politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines in criminal justice these experts denied the existence of free will and proposed replacing punishment with invasive cures such as the lobotomy in welfare they proposed eliminating the poor by sterilizing those deemed biologically unfit in business they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior in sex education they advocated creating a new sexual morality based on normal mammalian behavior without regard to longstanding ethical and religious imperatives based on extensive research with primary sources and archival materials john g west's captivating darwin day in america tells the story of

how american public policy has been corrupted by scientistic ideology marshaling fascinating anecdotes and damning quotations west s narrative explores the far reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature it also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong west concludes with a powerful plea for the restoration of democratic accountability in an age of experts

lists citations to the national health planning information center s collection of health planning literature government reports and studies from may 1975 to january 1980

a highly regarded scientist s examination of the battle between evolution and intelligent design and its implications for how science is practiced in america

focusing on the ground breaking and often controversial science of charles darwin the author seeks to bridge the gulf between science and religion on the subject of human evolution
