Remember, collaboration is about learning together, not copying answers.

7 Seeking Help from Your Instructor: Your instructor is your most valuable resource. Don't hesitate to ask for clarification on any confusing aspects of the lab manual or your results. Office hours and email are excellent avenues for getting personalized support.

**Analyzing Your Results Beyond the Right Answer:** The focus should not solely be on achieving the correct answer dictated by the lab manual. Instead, concentrate on understanding the following Sources of Error:

- Every experiment has inherent limitations and potential errors.
- Identify potential sources of error in your experiment and discuss their impact on your results.
- Limitations of the Experiment: Acknowledge the limitations of your experimental design and suggest ways to improve the experiment in future iterations.
