Data Visualization Impact of Answer Key Availability on Student Performance Illustrative Example Hypothetical Data The following chart illustrates a hypothetical relationship between the availability of an answer key and student performance on a postlab quiz. Insert a bar chart here. X-axis Group Group A Answer Key Available Group B Answer Key Not Available Y-axis Average Quiz Score. Show Group B having a slightly higher average score than Group A with error bars indicating variability. This hypothetical data suggests that while answer keys can provide immediate feedback <sup>3</sup> they may not necessarily translate to superior longterm knowledge retention or application of concepts. The slight difference in scores could be attributed to the aforementioned factors of passive learning vs active engagement with the material. More robust empirical studies are needed to establish definitive conclusions.
