 performance measures the handbook provides methods on how to identify implement and evaluate customer satisfaction and customer defined quality service

medical mycology deals with those infections in humans and animals resulting from pathogenic fungi as a separate discipline the concepts methods diagnosis and  
 treatment of fungal diseases of humans are specific incorporating the very latest information concerning this area of vital interest to research and clinical microbiologists  
 fundamental medical mycology balances clinical and laboratory knowledge to provide clinical laboratory scientists medical students interns residents and fellows with in  
 depth coverage of each fungal disease and its etiologic agents from both the laboratory and clinical perspective richly illustrated throughout the book includes  
 numerous case presentations

as malaria and other tropical diseases continue their resurgence questions about the potential impacts of environmental and demographic factors are becoming more  
 critical recent attempts to understand the increase in malaria incidence often acknowledge the importance of social economic and other contextual variables but fail to  
 explicitly incorporate them into models or consider how they evolve in relation to one another this problem is of crucial interest to the climate policy community which

has been buffeted by claims and counter claims concerning the impact of climate change on malaria this important volume examines the contextual determinants of malaria and attempts to develop methods for incorporating them into projections of future incidence internationally renowned health specialists economists and other social scientists provide regional and global perspectives on risk modeling the history of eradication efforts current determinants including environmental social and economic factors and prospects for new vaccines and drugs the contextual determinants of malaria argues that an association of climate change with increased malaria incidence will have at least as much to do with human aging poverty urbanization and population movement as with a rise in global temperatures by placing climate in this perspective the contextual determinants of malaria focuses attention on the public health needs most critical in both the immediate and long term future it encourages multidisciplinary analysis of malaria control and improves our understanding of the interactions of the diverse range of factors involved in the incidence and spread of the disease

one of the most urgent development challenges facing many low and middle income countries is the need for adequate financing systems to pay for health care provision to the estimated 1 3 billion impoverished people living in rural areas or working in the informal sector in urban areas this publication considers ways of improving the financing of health care at low income levels as part of a global strategy for increased investment in health and poverty reduction topics discussed include global and regional trends in healthcare financing strengths and weaknesses of community based health financing and experiences in asia and africa country case studies using household survey analysis from senegal rwanda india and thailand deficit financing and the impact of risk sharing on achieving health system goals
