crown covenant and cromwell is a groundbreaking military history of the great civil war or rather the last anglo scottish
war as it was fought in scotland and by scottish armies in england between 1639 and 1651 while the politics of the time

are necessarily touched upon it is above all the story of those armies and the men who marched in them under generals such as alexander leslie the illiterate soldier of fortune who became earl of leven james graham marquis of montrose and of course oliver cromwell the fenland farmer and lord protector of england historians sometimes seem to regard battles as rather too exciting to be a respectable field of study but determining just how that battle was won or lost is often just as important as unraveling the underlying reasons why it came to be fought in the first place or the consequences that followed here stuart reid one of scotlands leading military historians brings the campaigns and battles of those far off unhappy times to life in a fast paced and authoritative narrative as never before

in this concise and accessible biography martyn bennett examines the life of oliver cromwell one of the most controversial figures in world history this study challenges long held perceptions of cromwell and the commonwealth arguing that they need to be placed at the core of early modern british and irish history charting his early career the origins of his political and religious thought and the development of his notions of governance that influenced him as lord protector martyn bennett contests the post restoration vilification of cromwell to examine how his influence has shaped notions of citizenship identity and governance and informed the relationship between religion and the state in britain this radical interpretation will give students a clearer view of the motivations and achievements of a fascinating and pivotal figure in british history
