this book aims to broaden the horizons of academic integrity by discussing novel
 practices and technologies and the importance of student involvement in building a
 culture of academic integrity examples are the outreach efforts towards a range of non
 educational organisations the exploration and comparison of ethical policies and
 actions in different institutions and the improvement of student responses in research
 on sensitive topics it explores a range of scenarios and strategies adopted in different
 parts of the world during the covid 19 pandemic and addresses new technological
 advances for investigating types of academic misconduct that are difficult to find
 including translation plagiarism contract cheating the usage of the proctoring systems
 and the innovative use of data mining to detect cheating on on line quizzes the work
 shows how working with students is an essential part of the fight against academic
 misconduct the student voice can be a powerful source of motivation for students but
 educators also need to understand their perspectives especially regarding such an
 important topic as academic integrity

this collective work offers a historical approach to the issue of voters mobilisation and
 through case studies aims to expand the field's research agenda by taking into
 account less familiar mobilising strategies from various groups or parties both in Britain
 and the United States two different yet complementary approaches are used one from
 the top down with political parties the other from the bottom up with grassroots
 organisations to analyze how these groups either re connect citizens with politics or
 give birth to social movements which durably occupy and change the political
 landscape of the United States and Britain

South Asia Migration Report 2020 documents key themes of exploitation and
 entrepreneurship of migrants from the region this volume includes dedicated fieldwork

from india pakistan bangladesh and nepal analyses the impact of south asia migrant established businesses examines legal and legislative recourse against exploitation in destination countries factors in how migration as a phenomenon negotiates with gender environment and even healthcare this book will be indispensable for scholars and researchers of economics development studies migration and diaspora studies gender studies labour studies and sociology it will also be useful to policymakers think tanks and government institutions working in the area

naveed ahmed examines the impact of structural reform strategies of international financial institutions ifis on the rule of law good governance and development in pakistan the world bank the imf and other international financial institutions have a mixed track record of success in pakistan this book seeks to understand why this is the book explores how these institutions have been hindered in achieving social justice as a result of being caught between weak local governance structures and the competing interests of other powers including europe and the usa ahmed goes on to demonstrate how the ethos and instruments of rule of law and good governance can help counter the internal factors that have aggravated conditions of poverty and social injustice in pakistan

the mbr market continues to experience a massive growth the best practice in the field is constantly changing and unique quality requirements and management issues are regularly emerging the second edition of membrane biological reactors theory modeling design management and applications to wastewater reuse comprehensively covers the salient features and emerging issues associated with the mbr technology the book provides thorough coverage starting from biological aspects and fundamentals of membranes via modeling and design concepts to practitioners perspective and good application examples in the second edition the chapters have been updated to cover the recently emerged issues particularly the book presents the current status of the technology including market drivers restraints and development trend process fundamentals both the biological and membrane components have received in depth coverage in the new edition a new chapter has been added to provide a stronger focus on reuse applications in general and the decisive role of mbr in the entire reuse chain the second edition also comes with a new chapter containing practical design problems to complement the concepts communicated throughout the book other distinguishing features of the new edition are coverage of novel

developments and hybrid processes for specialised wastewaters energy efficiency and sustainability of the process aspects of mbr process automation and recent material on case studies the new edition is a valuable reference to the academic and professional community and suitable for undergraduate and postgraduate teaching in environmental engineering chemical engineering and biotechnology

energy recovery from waste resources holds a significant role in the sustainable waste management hierarchy to support the concept of circular economies and to mitigate the challenges of waste originated problems of sanitation environment and public health today waste disposal to landfills is the most widely used methodology particularly in developing countries because of limited budgets and lack of efficient infrastructure and facilities to maintain efficient and practical global standards as a consequence the dump sites or non sanitary landfills have become the significant sources of greenhouse gases emissions soil and water contamination unpleasant odors leachate and disease spreading vectors flies and rodents however waste can be utilized to produce a range of potential products such as energy fuels and value added products under waste biorefineries a holistic and quantitative view such as waste biorefinery on waste management must be linked to the actual country taking into account its socio economic situation local waste sources and composition as well as the available markets for the recovered energy and products therefore it is critical to understand that solutions cannot be just copied from one region to the others in fact all waste handling transportation and treatment can represent a burden to the cities environment and macro and micro economics except for the benefits obtained from recovered materials and energy equally significant is a clear and quantitative understanding of the industrial and public potential of utilizing recovered materials and energy in the markets as these can be reached without exacerbating the environmental issues using excessive transport the book explores new advancements and discoveries on the development of emerging waste to energy technologies practical implementation and lessons learned from sustainable wastemanagement practices under waste biorefinery concept which will accelerate the growth of circular economies in the world the articles presented in this book have been written by expert researchers and academics working in institutions at different countries across the world including germany greece japan south korea china saudi arabia pakistan indonesia malaysia iran and india the research articles have been arranged into three main subject categories 1 resource recovery from waste 2 waste to energy

technologies and 3 waste biorefineries this book will serve as an important resource for research students academics industry policy makers and government agencies working in the field of integrated waste management energy and resource recovery waste to energy technologies waste biorefineries etc the editorial team of this book is very grateful to all the authors for their excellent contributions and making the book successful
