more than 200 new infrastructure regulators have been created around the world in the last 15 years they were established to encourage clear and sustainable long term economic and legal commitments by governments and investors to encourage new investment to benefit existing and new customers there is now considerable evidence that both investors and consumers the two groups that were supposed to have benefited from these new regulatory systems have often been disappointed with their performance the fundamental premise of this book is that regulatory systems can be successfully reformed only if there are independent objective and public evaluations of their performance just as one goes to a medical doctor for a regular health checkup it is clear that infrastructure regulation would also benefit from periodic checkups this book provides a general framework as well as detailed practical guidance on how to perform such regulatory checkups

this volume brings together key articles in the burgeoning field of regulation the collection is interdisciplinary in keeping with study of regulation itself yet the book arranges and explores these articles to make the bewildering array of issues and concepts that comprise the study of regulation comprehensible to a criminological audience it will be of interest to all scholars and students of criminology and criminal justice as well as those concerned with reducing the crimes and harms of the powerful

space is no longer the domain of national space agencies today a significant majority of space activities are carried out by non governmental entities resulting in the accelerated evolution of space technologies and their applications this operational shift from public to private does not mean however that governments are no longer relevant in this era

of new space on the contrary as the operational role of the state has diminished its regulatory role has grown correspondingly acknowledging that the commercial landscape in space is an ever changing one this book explores how the canadian government has adapted to the new commercial space landscape and whether it is prepared to fulfil its authorisation and supervision responsibilities as the regulator of canada s space industry the fundamental research question posed therefore is whether canada s regulatory framework is appropriate given the increasing commercialisation of space to best answer this question the book provides a doctrinal analysis of canada s historical space policy and current space laws an empirical survey of the perspectives of those currently interacting with canada s regulatory framework and a comparative exploration of how other jurisdictions oversee commercial space activities motivated by legal moral and economic considerations the book recommends that canada enact a comprehensive national space law and provides an annotated draft law for this purpose by doing so the book intends to spark a meaningful conversation on how canada ought to fulfil its regulatory responsibilities a topic previously unaddressed in public and academic discourse
