soft law increasingly shapes and impacts the content of international law in multiple ways from being a first step in a norm making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties this is especially true in the area of human rights while relatively few human rights treaties have been adopted at the un level in the last two decades the number of declarations resolutions conclusions and principles has grown significantly in some areas soft law has come to fill a void in the absence of treaty

law exerting a degree of normative force exceeding its non binding character in others areas soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes despite these developments little attention has been paid to soft law within human rights legal scholarship building on a thorough analysis of relevant case studies this volume systematically explores the roles of soft law in both established and emerging human rights regimes the book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights but also helps to unsettle and critically question certain political and doctrinal beliefs following introductory chapters that lay out the general conceptual framework the book is divided in two parts the first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards its progressive and regressive effects and the role that different actors play in the incubation process the second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms these chapters examine the relationship between soft and hard law the role of different actors in formulating new soft law and the potential for eventual codification

according to the fbi about 4000 ransomware attacks happen every day in the united states alone victims lost 209 million to ransomware in the first quarter of 2016 even worse is the threat to critical infrastructure as seen by the malware infections at electrical distribution companies in ukraine that caused outages to 225 000 customers in late 2015 further recent reports on the russian hacks into the democratic national committee and subsequent release of emails in a coercive campaign to apparently influence the u s presidential election have brought national attention to the inadequacy of cyber deterrence the u s government seems incapable of creating an adequate strategy to alter the behavior of the wide variety of malicious actors seeking to inflict harm or damage through cyberspace this book offers a systematic analysis of the various existing strategic cyber deterrence options and introduces the alternative strategy of active cyber defense it examines the array of malicious actors operating in the domain their methods of attack and their motivations it also provides answers on what is being done and what could be done by the government and industry to convince malicious actors that their attacks will not succeed and that risk of repercussions exists traditional deterrence strategies of retaliation denial and entanglement appear to lack the necessary conditions of capability credibility and communications due to these malicious actors advantages in cyberspace in response the book offers the option of adopting a strategy of active cyber defense that combines internal systemic resilience to halt cyber attack progress with external disruption capacities to thwart malicious actors objectives it shows how active cyber defense is technically capable and legally viable as an alternative strategy for the deterrence of cyber attacks

behaviour problems are a significant cause of companion animal relinquishment and euthanasia this book provides up to date information about animal behaviour as well as practical advice on how veterinary practice professionals can manage undesirable animal behaviour and give down to earth appropriate and trusted advice to owners this practical and

this volume provides an authoritative cutting edge resource on the characteristics of both technological and social change in warfare in the twenty first century and the challenges such change presents to international law the character of contemporary warfare has recently undergone significant transformation in several important respects the nature of the actors the changing technological capabilities available to them and the sites and spaces in which war is fought these changes have augmented the phenomenon of non obvious warfare making understanding warfare one of the key challenges such developments have been accompanied by significant flux and uncertainty in the international legal sphere this handbook brings together a unique blend of expertise combining scholars and practitioners in science and technology international law strategy and policy in order properly to understand and identify the chief characteristics and features of a range of innovative developments means and processes in the context of obvious and non obvious warfare the handbook has six thematic sections law war and technology cyber warfare autonomy robotics and drones synthetic biology new frontiers international perspectives this interdisciplinary blend and the novel rich and insightful contribution that it makes across various fields will make this volume a crucial research tool and guide for practitioners scholars and students of war studies security studies technology and design ethics international relations and international law

psychology straddles areas from the biological to the social and cultural within that vast range there have been recent explosions of interest in neuropsychology genetics and epigenetics and the evolutionary bases of mindedness correspondingly there have been conceptual innovations and new empirical evidence in relation to the embodied social and discursive processes supporting mind and personhood simultaneously awareness of developmental processes and their dynamic interweaving of genetic physiological neurological social and cultural elements has also increased might such developments help connect the dots between diverse aspects of mindedness and the contexts within which it arises whilst it seems clear that mind is co constituted of both biological and socio cultural processes how might we bring these disparate realms of knowledge together in a number of these areas suggestive integrative possibilities have been explored e g predictive processing embodied and situated cognition dynamic developmental systems theory and insights such as a focus on action knowledge as skills embeddedness and connectivity have been pursued across a range of disciplines this

edited collection of articles bring together such possibilities and others in the same forum in order to provide an opportunity to re visit a recurring discussion within theoretical psychology the claimed lack of and potential for theoretical synthesis and unity while the chapters range over a number of areas of research this collection is focused on current prospects for conceptual synthesis within or convergence of research between aspects of mind and mindedness as is clear from the contributions it highlights integrative conceptual proposals that emphasize action orientation process embeddedness and connectivity especially between explanatory levels beyond specific proposals for integration several of the contributions explicitly or implicitly expose broader questions about the purpose of psychological research the epistemological and ontological commitments required and the relevant social political and economic contexts within which such research is performed this is perhaps inevitable since any aim for synthesis of various understandings of mind will or should lead to consideration of the general implications beyond the science that follow from an integrated account of mind and mindedness whether or not the contributions in this volume provide insights into profitable paths towards greater theoretical synthesis in the sciences of mind or alternatively provide grist for the mill of renewed skepticism over the potential or even desirability of such synthesis is unpredictable whichever the outcome we feel sure that they will help provoke future productive research in and thinking about the sciences of mind kevin moore and john cromby associate guest editors

trb s national cooperative highway research program nchrp report 722 assessing highway tolling and pricing options and impacts provides state departments of transportation dots and other transportation agencies with a decision making framework and analytical tools that describe likely impacts on revenue generation and system performance resulting from instituting or modifying user based fees or tolling on segments of their highway system volume 2 travel demand forecasting tools provides an in depth examination of the various analytical tools for direct or adapted use that are available to help develop the forecasts of potential revenue transportation demand and congestion and system performance based on tolling or pricing changes volume 1 decision making framework includes information on a decision making framework that may be applied to a variety of scenarios in order to understand the potential impacts of tolling and pricing on the performance of the transportation system and on the potential to generate revenue to pay for system improvements publication information

bachelor thesis from the year 2014 in the subject economics foreign trade theory trade policy grade a course economics international trade obesity corruption developing countries global south nestle pacific island nations language english abstract this research paper was written as my final honors thesis in economics i was questioning the somewhat sudden high rates of obesity found in many developing countries today i found several reasons for why obesity has sky rocketed in the global south finding that most trends leading to obesity derived from the western lifestyle one significant change between the western world and the developing world is that for the global south the transition to industrialization and development happened at a much faster pace the sudden modernization has in many places led to extreme changes in behavior and lifestyle the one trend that reoccured in most developing countries and had the

highest effect on obesity rates was the infiltration of food products mostly from western food corporations i look at some specific practices made by companies like nestle and others as well as looking at behavioral changes in some of the worst hit areas like the pacific island nations
