- Use the correct thread: Employ high-quality serger thread designed for smooth feeding. Avoid using thread that is too thick or too thin for your machine.
- Follow a systematic approach: Thread each looper and needle sequentially, ensuring each thread is correctly positioned in its designated guide.
- Use thread guides: The tension discs and thread guides are your friends. Use them! They are there for a reason to help keep the threads from tangling.
- Check for tension: Ensure that the tension on each thread is properly adjusted. This is often a key to preventing thread breakage and uneven stitching.
