In this issue of *Physician Assistant Clinics*, guest editor Diane Bruessow of Yale School of Medicine brings her considerable expertise to the topic of gender minority medicine, filling a knowledge gap in transgender health in primary care. This issue features articles by top experts that focus on up-to-date standards regarding clinical care, hormone therapy, inclusion, hormone therapy, and surgery, and more. It contains 12 relevant practice-oriented topics, including interpreting gendered lab results, deferring puberty in transgender adolescents, and associated clinical care, administrative considerations, or creating a welcoming environment for transgender inclusion, navigating transgender health in the uniformed services, and more. It provides in-depth clinical reviews on gender minority medicine, offering actionable insights for clinical practice, presents the latest information on this timely focused topic under the leadership of experienced editors in the field, authors synthesize and distill the latest research and practice guidelines to create clinically significant topic-based reviews.

The field's definitive text, updated with the latest advances in critical care and 1,000 color images, *Doody's Core Title for 2024 Comprehensive and Current Hall, Schmidt, and Wood's Principles of Critical Care* is the authoritative guide to diagnosing and treating the most common problems encountered in the practice of critical care. Written by expert critical care physicians who are also experienced teachers, it features an organization, thoroughness, and clarity unavailable in other critical care resources. This peerless guide provides consensus on the complex and often conflicting data in the practice of critical care, along with copious diagnostic and treatment algorithms. The text covers every aspect of critical care medicine essential to successful clinical practice, ranging from basic principles to the latest technologies. This updated fifth edition is highlighted by in-depth, up-to-date descriptions of the unique presentation, differential diagnosis, and management of specific critical illnesses, a logical organ system approach that simplifies the search for thorough and practical information necessary to manage a patient's specific condition, new chapters on oxygen delivery systems, ultrasound in critical care, fungal and viral infections, pulmonary hypertension, alcohol withdrawal, and COVID-19, and hemophagocytic lymphohistiocytosis (HLH). New material regarding critical care pandemic preparedness and response, enhanced cross-disciplinary chapters addressing the structures and

systems of critical care including staffing safety and informatics new contributions on caregiver and family issues and the implications of disordered sleep for the critically ill a full color presentation
