1 health is a state of being that is lacking a precise definition
the fitness industry offers no definitions nor does the medical industry
2 health is the body s ability to maintain the necessary balance between the catabolic and anabolic states
fitness is the body s ability to withstand recover from and adapt to environmental threats
3 the distinction between exercise and physical activity is that exercise is purposefully directed activity that stimulates the body to produce a positive adaptation in one s level of fitness and health
physical activity in general while yielding

the potential to produce certain adaptations in one's fitness and health can also undermine one's health 4 the idea that athletes are healthy because they are fit is false many athletes who compete at a world class level do not achieve that level of world class performance in a way that enhances their health this is because it is not possible to do so
