new york times bestselling author the renowned economic theorist explains how america can and must create a post fossil fuel culture to survive we can't keep doing business as usual facing a global emergency a younger generation has spearheaded a national conversation around a green new deal a movement with the potential to revolutionize society but while the green new deal has become a lightning rod in the political sphere there is a parallel movement emerging within the business community that will shake the very foundation of the global economy in coming years key sectors of the economy are fast decoupling from fossil fuels in favor of ever cheaper solar and wind energies and the new business opportunities and employment that accompany them new studies are sounding the alarm that trillions of dollars in stranded fossil fuel assets could create a carbon bubble likely to burst by 2028 causing the collapse of the fossil fuel civilization the marketplace is speaking and governments will need to adapt if they are to survive and prosper in the green new deal jeremy rifkin delivers the political narrative and economic plan

for the green new deal that we need at this critical moment in history the concurrence of a stranded fossil fuel assets bubble and a green political vision opens up the possibility of a massive shift to a post carbon ecological era in time to prevent a temperature rise that will tip us over the edge into runaway climate change with twenty five years of experience implementing green new deal style transitions for both the european union and the people s republic of china rifkin offers his vision for how to transform the global economy and save life on earth the green new deal takes a stance quite different from that of typical green new deal supporters he s interested in building factories farms and vehicles in a fossil free world asserting that the green new deal is all about infrastructure the new york times book review an urgent endorsement of efforts to remake a doomed fossil fuel economy before it s too late kirkus reviews

open innovation enabled through crowdsourcing is one of the hottest topics in management strategy today particularly striking and of vital importance to the world are the pioneering efforts to apply crowdsourcing technology and open innovation to solve social environmental and economic sustainability challenges crowdrising sets out these challenges as context and then highlights the experiences of leaders and early adopters identifies implementation guidelines critical success factors and lessons learned and finally projects where the field is going in the future with a strong focus on the applications of crowdsourcing for innovation engagement and market intelligence the book profiles the initiatives of companies ngos and technology providers using crowdsourcing to develop these solutions to global problems it addresses the key challenges impacting organizations 1 identifying more sustainable transport recycle and repurpose products and 2 discovering and i needed to transform global economic growth drive human prosperity and replenish the planet s resources

energy projects in latin america are a major contributor to economic growth worldwide this book is the first to offer a comprehensive in depth analysis of specific issues arising from energy and natural resources contracts and disputes in the region covering a wide range of procedural substantive and socio legal issues the book also includes how states have shifted from passive business partners to more active controlling players the book contains an extensive treatment and examination of the particularities of arbitration practice in latin america including arbitrability public order enforcement and the complex public private nature of energy transactions specialists experienced in resolving international energy and natural disputes throughout the region provide detailed analysis of such issues and topics including state owned entities as co investors or contracting parties role of environmental law indigenous rights and public participation issues related to political changes corruption and quantification of damages climate change renewable energy and the energy transition force majeure hardship and price reopeners arbitration in the

electricity sector take or pay contracts recognition and enforcement of awards tension between stabilization clauses and human rights mediation as a method for dispute settlement in the energy and natural resources sector and different comparative approaches taken by national courts in key latin american jurisdictions the book also delivers a clear explanation on the impact made to the arbitration process by covid 19 emerging laws changes of political circumstances the economic global trends in the oil gas market the energy transition and the rise of new technologies this invaluable book will be welcomed by in house lawyers government officials as well as academics and rest of the arbitration community involved in international arbitration with particular interest in the energy and natural resources sector

the authors document how four forces exponential technologies the diy innovator the technophilanthropist and the rising billion are conspiring to solve our biggest problems abundance establishes hard targets for change and lays out a strategic roadmap for governments industry and entrepreneurs giving us plenty of reason for optimism

this book explores the role of private mining rights in the utopian imaginary of space colonisation it presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier written in an engaging style the book investigates a novel case study in the history of capitalism and the commons the emergence of a nascent space mining industry undergirded by a contentious legislative framework in 2015 the us passed laws that would recognise the claims of us corporations to own and sell space resources this unilateral act of pre emptive law making would appear to contravene the terms of the un outer space treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation using this central dynamic between privately held mining rights and outer space as a global commons matthew johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity the anticipatory expansion of private property claims beyond the earth both resonates with and problematises the terrain of political history such as the tensions between states and markets public law and private power the commons and exclusive property the emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of earth and space this book is compelling reading for anyone interested in the social study of space law economics technology politics and property rights
