excerpt from rahill s corporation accounting and corporation law talking with a friend a little over four months ago on the multiplicity of corporations i expressed the opinion that a book devoted exclusively to corporation accounting and corporation law should find favor among accountants and others interested in corporations he shared my conviction and strongly advised me to set about the publication of such a book this little volume is the result of my labors performed chiefly at night there are hundreds of books devoted to book keeping in general but none that i know of devoted entirely to this important branch of the science of book keeping that this is not complete i own that it has its shortcomings i confess but i trust it

will not be judged by its shortcomings but rather by such merit as may be found in it i have endeavored to make this work more than interesting my aim has been to make it instructive and useful to the large number of good book keepers who have not had practical training in this branch of accounting no one man knows all there is to be known of any science and 1 do not claim to be a master of this therefore i invite and will appreciate friendly criticism and endeavor to profit by it in the future stock exchanges are so interwoven with stock companies that they necessarily form a part of this work and constitute one of its most interesting features a digest of the laws of all the states is also a unique and very valuable appendix about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
