derived from the renowned multi volume international encyclopaedia of laws this book provides a practical analysis of criminal law in italy an introduction presents the necessary background information about the framework and sources of the criminal justice system and then proceeds to a detailed examination of the grounds for criminal liability the

justification of criminal offences the defences that diminish or excuse criminal liability the classification of criminal offences and the sanctions system coverage of criminal procedure focuses on the organization of investigations pre trial proceedings trial stage and legal remedies a final part describes the execution of sentences and orders the prison system and the extinction of custodial sanctions or sentences its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for criminal lawyers prosecutors law enforcement officers and criminal court judges handling cases connected with italy academics and researchers as well as the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative criminal law

this book presents a historical and scientific analysis as historical epistemology of the science of weights and mechanics in the sixteenth century particularly as developed by tartaglia in his *quesiti et inventioni diverse* book vii and book viii 1546 1554 in the early 16th century mechanics was concerned mainly with what is now called statics and was referred to as the *scientia de ponderibus* generally pursued by two very different approaches the first was usually referred to as aristotelian where the equilibrium of bodies was set as a balance of opposite tendencies to motion the second usually referred to as archimedean identified statics with centrobarica the theory of centres of gravity based on symmetry considerations in between the two traditions the italian scholar niccolò fontana better known as tartaglia 1500 1557 wrote the treatise *quesiti et inventioni diverse* 1546 this volume consists of three main parts in the first a historical excursus regarding tartaglia s lifetime his scientific production and the *scientia de ponderibus* in the arabic islamic culture and from the middle ages to the renaissance is presented secondly all the propositions of books vii and viii by relating them with the *problemata mechanica* by the aristotelian school and iordani opusculum *de ponderositate* by jordanus de nemore are examined within the history and historical epistemology of science the last part is relative to the original texts and critical transcriptions into italian and latin and an english translation this work gathers and re evaluates the current thinking on this subject it brings together contributions from two distinguished experts in the history and historical epistemology of science within the fields of physics mathematics and engineering it also gives much needed insight into the subject from historical and scientific points of view the volume composition makes for absorbing reading for historians epistemologists philosophers and scientists

if subjecting war to law is one of the most important legal achievements of the 20th century progressing further in that direction is one of the most important challenges for the 21st century the problems it poses are many the term war has formally fallen into disuse and we talk about peacekeeping armies are today the product of cooperation between states and international organizations private contractors increasingly participate in warlike activities as the case of the iraq war demonstrates and the lines between war and very serious forms of crime terrorism organized crime are increasingly blurred this volume compiles the contributions presented at xvth international congress on social defence and tackle the criminal legal issues raised by these new scenarios it constitutes

---

an innovative volume gathering together the work of both academic and military authors who have drawn on their theoretical and practical experience

this fourth volume in the comparative succession law series provides a historical and comparative study of how and by whom the estates of deceased persons are administered drawing upon the legal traditions of europe and beyond when a person dies their assets or their value will transfer to those entitled to inherit them following the deceased's will or in the absence of a will according to the rules of intestate succession along the way the assets have to be identified located collected in and safeguarded debts owed by the deceased or arising from the death must likewise be identified and then met if need be with the proceeds from a sale of estate assets the whole process by which this is done from the time of the death until the time of final distribution of the assets to those entitled to receive them is the subject of administration of estates the topic has sometimes been neglected even within national legal systems and systematic comparative analysis at least in the english language is almost wholly lacking the volume thus seeks to fill an important gap in the field of comparative succession law focusing on the legal systems of europe and on countries which have been influenced by the european experience the volume examines the law in austria england and wales france germany hungary italy the netherlands norway russia scotland and spain as well as presenting chapters on australia and new zealand canada china south africa south america and the united states of america the historical background to the main legal traditions in europe is represented by chapters on roman law the customary law of early modern continental europe and english law before 1837
