psychologists regard the relationship between attitudes and behavior as a key to understanding human behavior here leading researchers discuss basic and applied issues relating to how human thought translates into action the contributors focus on the theory of planned behavior a model of attitude behavior relations that takes into account not just attitudes but also the influence of significant others around us issues of personal agency and motivation the book begins with an overview of the theory of planned behavior from the initial impetus to better understand attitude behavior relations through the theory of reasoned action to the theory of planned behavior among the applied issues discussed in subsequent chapters are using the model to predict homeless persons use of services understanding the motivation underpinning suicide in an at risk sample and experimentally manipulating antecedents of risky driving behavior more methodologically oriented chapters explore how the theory of planned behavior may be developed in the future several chapters discuss the potential integration of the theory of planned behavior with social identity theory and goal theory other chapters discuss the key components of the theory of planned behavior and whether the theory might usefully be extended with the concept of descriptive norms this book considers a full spectrum of important developments that enhance our understanding of the theory of planned behavior and efforts to extend it from applications to new avenues for research the chapters that make up this book address important issues surrounding theoretical and practical approaches to addressing problems in attitude behavior research

master s thesis from the year 2013 in the subject psychology work business organisation grade 2 3 technical university of munich language english abstract when going for grocery shopping some consumers make up their minds about what to buy and write down shopping lists others just go into the supermarket and do not really think beforehand about the things

they need although in both situations individuals engage in different ways of decision making on the purchase of groceries when coming home and putting things into the shelves they positively or negatively assess the things they bought whereas in some situations one gets a positive feeling because e.g. s/he purchased all the products on the shopping list in another situation a consumer might end up being bored because s/he just bought the groceries which are perceived as useful and did not listen to his/her inner voice calling for more than just the fulfillment of utilitarian needs generally consumers can consciously do their purchases and decide for products after thinking on it or can consider a product's attributes and let their intuition decide in the interest of the consumer the question emerges how the consumer decides at best does a consumer receive greater satisfaction from consciously elaborating about the products s/he is facing or is it better not to think consciously when facing product choices this question is differently assessed by different models on decision making whereas some authors (Ajzen 2011, Bandura 1986, 1997, Deci & Ryan 1985, Payne et al. 1993) emphasize consciousness in decision making there is also a large number of proponents of unconscious thought (Dijksterhuis 2004, Dijksterhuis et al. 2005, 2006a, 2006b, 2006c, Levine 1996, Bargh 2002 and Wilson et al. 1993, Dijksterhuis and Nordgren 2006b, p. 96) argue for the superiority of unconscious decision making by mentioning that conscious thought is constrained by the low capacity of consciousness which results in sub-optimal choices with regard to food products this general superiority of unconscious thought is highly questionable on the one hand consumers constrain themselves in taking into account only specific products which respect certain criteria as e.g. with diabetics and food products with less sugar content on the other hand food products are also bought because consumers want to confirm their conscience by purchasing e.g. fair trade products which among other things are associated with a fair payment of farmers
