comer and Gould's psychology around us demonstrates the many often surprising always fascinating intersections of psychology with students' day to day lives. Every chapter includes sections on human development, brain function, individual differences, and abnormal psychology that occur in that area. These cut across sections highlight how the different fields of psychology are connected to each other and how they connect to everyday life. Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behavior. This theme is reinforced throughout the chapter in boxed readings and margin notes that celebrate the extraordinary processes that make the everyday possible and make psychology both meaningful and relevant. The text presents psychology as a unified field, the understanding of which flows from connecting its multiple subfields and reinforces the fact that psychology is a science with all that this implies: research methodology, cutting edge studies, the application of critical thinking.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her manual for writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, a manual for writers of research papers, theses, and dissertations has been fully revised to meet the needs of today's writers and researchers. The manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles: notes/bibliography and author/date. An array of source types with contemporary examples and detailed guidance on citing online resources. The final section treats all matters of editorial style with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of the Chicago Manual of Style, with an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available. A manual for writers remains the essential resource for students and their teachers.
