in the early second century ce someone was described as playing a pipe with a bag tucked under his armpit that man the first named piper in history was the roman emperor nero since then this improbable conflation of bag and sticks has become one of the most beloved and contested instruments of all time when another piping emperor tsar peter the great watched his pet bear take its last breath he decided the creature would live on as a bagpipe this rich and vivid history tells the story of an instrument boasting over 130 varieties yet commonly associated with just one form and one country scotland and its familiar great highland bagpipe in fact the pipes are played across the globe and their story is a highly diverse one which illuminates society in remarkable unexpected ways richard mclauchlan charts the rise of women pipers investigates how class privilege and capitalism have shaped the world of piping and explores how the meaning of a national instrument can shift with the currents of a people s identity the vibrancy and inventiveness characterising today s pipers still speak to the potency of this fabled and once feared instrument to which mclauchlan is our surefooted guide

with equal measures of wit and wisdom the author of 99 glimpses of princess margaret draws a deeply original hilarious and telling portrait of the queen herself she was the most famous person on earth she first appeared on the cover of time magazine at the age of three when she died few people were old enough to recall a time when she was not alive her likeness has been reproduced in photographs on stamps on the notes and coins of thirty different currencies more than any since jesus it is probable that over the course of her ninety six years she was introduced to a greater number of different people than anyone else who has ever lived likely well over half a million yet this most closely observed of all women rarely left any real impression on those she encountered beyond vague notions of her radiance and sense of duty a high proportion of those she met can remember what they said to her but not a word of what she said to them up until now the curious tactic employed by biographers of the queen has been to ignore what is interesting and to concentrate on what is not craig brown

the author of 150 glimpses of the beatles and hello goodbye hello rejects this formula bringing his kaleidoscopic approach to the most famous and most guarded woman on earth examining the queen through a succession of interlocking prisms with q this fantastically funny marvelously insightful journalist gives us an unforgettable portrait of the omnipresent elusive queen elizabeth ii

the big music tells the story of john sutherland of the grey house who is dying and creating in the last days of his life a musical composition that will define it yet he has little idea of how his tune will echo or play out into the world and as the book moves inevitably through its themes of death and birth change and stasis the sound of his solitary story comes to merge and connect with those around him in this remarkable work of fiction kirsty gunn has created something as real as music or as magical as a dream one emerges at the end of it altered and changed not so much a novel as a place the reader comes to inhabit and know the big music is a literary work of undeniable originality and power
