this book analyses the efforts throughout east asia to deploy education for purposes of political socialization and in particular in order to shape notions of identity the chapters also examine the trend of common textbook initiatives which have recently emerged in east asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual mis representation these are analysed in relation to the east asian political context and compared with previous and ongoing endeavours in other parts of the world particularly europe which have been keenly observed by east asian practitioners written by a group of international education experts chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self and indeed homogenized visions of significant others including contributions from scholars and curriculum developers involved personally in the writing of national and multi national history textbooks this book will be of interest to students and scholars of asian education asian history and comparative education studies gotelind müller is professor of chinese studies university of heidelberg germany

social movements have shaped and are shaping modern societies around the globe this is evident when we look at examples such as the arab spring spain's indignados and the wider occupy movement in this volume experts analyse the classic and new social movements from a uniquely global perspective and offer insights in current theoretical discussions on social mobilisation chapters are devoted both to the study of continental developments of social movements going back to the nineteenth century and ranging to the present day and to an emphasis on the transnational dimension of these movements interdisciplinary and truly international this book is an essential text on social movements for historians political scientists sociologists philosophers and social scientists

in history of the rise and influence of the spirit of rationalism in europe william edward hartpole lecky meticulously examines the development of rationalist thought

across Europe detailing its philosophical underpinnings and societal impacts from the Renaissance to the contemporary era. Lecky's scholarly treatise is characterized by a lucid prose style that encourages accessibility while maintaining intellectual rigor. The work situates itself in the broader context of 19th-century philosophical discourse, challenging prevailing dogmas and exploring the interplay between reason, morality, and religious belief in shaping modern thought. Lecky, an Irish historian and philosopher, was deeply influenced by the intellectual currents of his time, particularly the Enlightenment's emphasis on reason, progress, and empirical evidence. His academic background, coupled with a keen interest in social and political philosophy, provided him with the necessary tools to critique traditional narratives while advocating for the principles of rationalism. His broader oeuvre reflects a commitment to understanding the historical evolution of ideas and their influence on contemporary society. This monumental work is recommended for anyone interested in the evolution of rational thought and its implications for modern philosophy and ethics. Lecky's comprehensive analysis offers readers valuable insights into the forces that have shaped European intellectual history, making it an essential read for students of history, philosophy, and social sciences.

The public visibility of Islam is becoming increasingly controversial throughout European countries, with case studies drawn from France, Germany, Italy, Spain, and the UK. This book examines a range of public issues, including mosque construction, ritual slaughter, Sharia councils, and burqa bans, addressing the question of Islamic difference in public life outside the confines of established normative discourses that privilege freedom of religion, minority rights, or multiculturalism. Acknowledging the creative role of dissent, it explores the manner in which public controversies unsettle the religious/secular divide and reshape European norms in the domains of aesthetics, individual freedom, animal rights, and law. Developing an innovative conceptual framework and elaborating the notion of controversy as a methodological tool, Islam and public controversy in Europe draws our attention to the processes of interaction, confrontation, and mutual transformation, thereby opening up a new horizon for rethinking difference and pluralism in Europe. As such, it will appeal to scholars across the social sciences with interests in religion, integration, cultural difference, and the public sphere.
