describes through photographs the natural history of the sonoran desert of the southwestern united states and northern mexico

the landscape of the sonoran desert region varies dramatically from parched desert lowlands to semiarid tropical forests and frigid subalpine meadows a natural history of the sonoran desert takes readers deep into its vast expanse looking closely at the relationships of plants and animals with the land and people through time and across landscapes

amazing photography and tons of factual information on the animals plants climate and landscape come together to give a complete picture of this ecosystem in action subjects cover the wide diversity of living things in this habitat from the giant saguaro cactus and ocotillo to javelinas rattlesnakes and dozens of desert birds

the author bill little introduces the reader to the seven divisions of the sonoran desert in arizona sonora and baja california and then takes you on a tour to discover desert plants from nogales to kino bay with side trips to puerto libertad and tastiota all in the state of sonora along the way you ll see the weird the exotic the rare and many other beautiful plants of this unique piece of the sonoran desert written in an easy to understand manner the sonoran desert scrapbook has close up and general view color photos for each plant a complete description including flowering time and a location where each plant can be seen sonora is also the ancient homeland of the seri indians and this book covers the ethnobotany and supernatural beliefs of the seri for many of the plants they used the detail and photography in this book will be enjoyed by tourists as well as the more serious native plant enthusiast william j little has a degree in forest range management from colorado state university during a thirty year career with the u s forest service he worked in oregon idaho and utah serving as either a forester forest ranger or range specialist after retiring from the forest service he was a range and environmental consultant bill has now turned his attention to one of the more fascinating desert areas of the world and has spent the past fifteen years roaming the sonoran desert in arizona sonora and baja california to study and photograph its unique variety of plants the result is this guide to some of the most interesting and unusual plants found in the deserts lining the sea of cortez near kino bay sonora mexico

although possessing a common physical heritage the sonoran desert has taken on highly contrasting forms in its american and mexican portions this work does not therefore attempt a regional study in the usual sense of the term but is rather an examination of disparate economic development much influenced by contrasting technological achievements as well as the accidents of history although the significance of geographic regionalism is implicit throughout this study no attempt is made to show any overriding unity at work geographical or otherwise welding together a desert region instead the desert acts as a stage for social drama in which drought and extreme heat provide the essential backcloth the scarcity of water and man s inability to grow crops without irrigation have not indeed changed with time and only constant reference to this immutable factor can give meaning to the evolution of human activities within the desert
