the book health and ethics stems from the need to divulge the knowledge and emotions shared by students and professors during the first lessons of moral philosophy led by professors pacifici noja and boccanfuso a spontaneous bond which had arisen amongst the two counterparts led to an innovative model of creative interaction the students divided into 17 groups had to choose among different themes suggested by the professors according to their preferences and personal interests the themes range among many fields but they have one purpose in common highlighting and studying the different relationships bonded between the physician and the patient therefore the book was designed to be an important resource for the comprehension and the understanding of both the difficulties and the duties a physician needs to face but also of the satisfaction and happiness which can arise from them

when speaking of society's role in ethics one tends to think of society as regimenting people through its customs ethics and social survival rejects theories that treat ethics as having justification within itself and contends that ethics can have a grip on humans only if it serves their deep seated need to live together it takes a social survival view of ethical life and its norms by arguing that ethics looks to society not for regimentation by customs but rather for the viability of society fisk traces this theme through the work of various philosophers and builds a consideration of social divisions to show how rationalists fail to realize their aim of justifying ethical norms across divisions the book also explores the relation of power and authority to ethics without simply dismissing them as impediments and explains how personal values such as honesty modesty and self esteem still retain ethical importance finally it shows that basing ethics on avoiding social collapse helps support familiar norms of liberty justice and democracy and strives to connect global and local ethics
