building largely on insights from india and case studies in brazil china and south africa this book provides insights into the contested topic of governance and governed from a state society inter relationship perspective it argues that the centrality of an understanding of state governance today is rooted in concerns regarding diversities and contingencies of concrete political reality to address inequalities exclusion and vulnerabilities these countries are part of the bricss consortium and have been recognised for their growth potential in the world economy but their economic progress alone may not necessarily translate into a better quality of life the approach here is not to focus on a particular understanding of governance but to utilise a wider lens to understand the nature and extent
