shifting cultivation is one of the oldest forms of subsistence agriculture and is still practised by millions of poor people in the tropics typically it involves clearing land often forest for the growing of crops for a few years and then moving on to new sites leaving the earlier ground fallow to regain its soil fertility this book brings together the best of science and farmer experimentation vividly illustrating the enormous diversity of shifting cultivation systems as well as the power of human ingenuity some critics have tended to disparage shifting cultivation sometimes called swidden cultivation or slash and burn agriculture as unsustainable due to its supposed role in deforestation and land degradation however the book shows that such indigenous practices as they have evolved over time can be highly adaptive to

land and ecology in contrast scientific agricultural solutions imposed from outside can be far more damaging to the environment and local communities the book focuses on successful agricultural strategies of upland farmers particularly in south and south east asia and presents over 50 contributions by scholars from around the world and from various disciplines including agricultural economics ecology and anthropology it is a sequel to the much praised voices from the forest integrating indigenous knowledge into sustainable upland farming rff press 2007 but all chapters are completely new and there is a greater emphasis on the contemporary challenges of climate change and biodiversity conservation

getting the climate science facts right discusses climate change science with reference to the intergovernmental panel on climate change ipcc addressing climate change is the most important public priority of the 21st century unlike many issues however this issue is being driven by both science and its interface with politics the main institution for bridging this division between science and international politics is the ipcc as such it is the main source of the facts from which climate change policy is developed this book describes the ways in which the ipcc arrives at these facts and so can be sure they are complete and evidence based seldom in history has science had such a direct relationship with politics the negotiation of an international policy regime requires at its outset an agreement on the facts in this case the facts are scientific complex and contentious governments have recognized this and have by using the ipcc set up institutional machinery to provide facts from a source and in a manner that they can accept the way in which the ipcc functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level starting with a process to examine review and debate scientific findings leading to a consensus about scientific fact usually expressed as probabilities that the findings will hold over time the ipcc then concludes by using the kind of consensus development mechanism that the united nations typically uses to achieve agreements leading to the formation of policy regimes the book examines the structure of the ipcc its composition and its procedures in order to achieve an understanding of its role and future

songwriters will find inside tips on how and where to place their songs in more than 2 000 up to date listings of song markets helpful articles on how to market songs and listings of contests competition and workshops are also included
