disasters and their management are today central to public and political agendas rather than being understood as exclusively acts of god and nature natural disasters are increasingly analysed as social vulnerability exposed by natural hazards a disaster following an earthquake is no longer seen as caused exclusively by tremors but by poor building standards ineffective response systems or miscommunications this book argues that the shift in how a disaster is spoken of and managed affects fundamental notions of duty responsibility and justice the book considers the role of law in disasters and in particular the regulation of disaster response and the allocation of responsibility in the aftermath of disasters it argues that traditionally law has approached emergencies including natural disasters from a dichotomy of normalcy and emergency in the state of emergency norms were replaced by exceptions democracy by dictatorship and rights by necessity however as the disaster becomes socialized the idea of a clear distinction between normalcy and emergency crumbles looking at international and domestic legislation from a range of jurisdictions the book shows how natural

disasters are increasingly normalized and increasingly objects of legal regulation and interpretation the book will be of great use and interest to scholars and researchers of legal theory and natural hazards and disasters

analyses the governance of chinese charitable trusts and the political dynamics between the state and civil society actors

over the past two decades the field of law and economics has matured to the point where scholars have employed the latest economic methods in an effort to understand the nature of legal rules and to guide legal reform this book is the first to provide a broad survey of this scholarship as it has been applied to problems in torts contracts property and litigation it will therefore serve as a convenient reference guide to this exciting field

based on groundbreaking new ideas this treatise signals a return to a rebuilding and reshaping of the curriculum as the primary tool for education this book presents a new definition of curriculum and what it should consist of with a view toward creating a more ethical educated and thinking person rather than treating students as products for society this approach returns to a view of the curriculum as a tool for educating students to reason through problems be bold in creating new solutions and contribute to a more vibrant just world the university curriculum introduced in the post renaissance era dominated by doctrinal philosophy is based on learning or skill development suitable for creating a learned society that would eventually serve the establishment this curriculum has been promoted as the only form suitable for the modern education system it has introduced a tremendous amount of tangible advancement in all fields of the structured education system these tangible gains are often promoted as knowledge this has created confusion between education acquiring knowledge and learning training or skill development this book seeks to clarify the difference between these two divergent views of education it has been shown that the current curriculum is not conducive to increasing a student s knowledge because it is based on consolidating preconceived ideas that have been either passed on from previous generations or gained through personal experience in most cases this mode of cognition will not create a pathway for gaining knowledge that brings one closer to discovery the term education on the other hand is always meant to be a process of bringing forth one s inherent qualities and unique traits necessary and sufficient for increasing one s knowledge
