from the preface the arrangement of vegetation is a matter of such moment as to require little justification in advocating its needfulness to lovers of nature the advantages of discussing such a subject must in truth be obvious for the aim of horticulture is to beautify the earth books setting forth right principles are useful to students and even to proficients are not without their advantages when the object is once brought before the thinker s attention he must be impressed by its importance the intention indeed is no other than to enhance the productiveness of the soil and to fitly ennoble our temporary abode to do this effectively is to develop the thinking principle itself to further the interests of both heart and soul the better culture of the land taking into account the activities and energies which it is calculated to elicit cannot be otherwise than advantageous cannot in fact fail to influence for good the life of man when the mind is suitably prepared working with skill and method on the materials which have been lent for our instruction and our use every act tends to elevate the soul our task indeed is to assist nature to realise some effects that perchance shall last for ages to render natural objects yet more gracious is of greater moment than is commonly imagined for after all what would life be without beauty it is perhaps questionable whether any great man ever yet existed who did not love nature in fact in his truth to nature resides in a sense the secret of his greatness monuments of marble and bronze may excite wonder and amazement but to develop the material world in order to improve our thoughts helps us to love our fellows yet better and tends to raise the heart to god my inexperience in authorship has kept me from venturing to place these pages before the public at an earlier date of the truth of the chief of the conclusions to which i have given expression in these pages i have for some time been convinced and i submit them now only after a learned friend has gone carefully over the manuscript for which i feel most deeply indebted i beg also to express my earnest thanks to thomas moore esq f l s for looking over the proof sheets and to mr w r bradshaw for his various valuable labours repton seems to have been aware of the object to be gained in improving scenery when he wrote the following words landscape gardening is if possible to inculcate the great secret of true happiness to gain this we must endeavour for the general good to develop the true beauties of the natural objects which we assume to arrange and to display their excellencies in such a way as to make them consonant with the feelings of the human race author

this book is intended to provide information to those who wish to interact with the landbase in an ecologically sustainable manner practitioners charged with the administration of land based programs in industry and government will find the information presented useful it should also be a resource for many community groups involved in land use decision making humans continue to use forests and make decisions about land use without perfect information conservation biology principles for forested landscapes is intended to enable the improvement of planning and decision making processes by providing ecological information on issues of forest use current approaches are not working where information exists on new ecologically sustainable approaches practitioners should switch where the

information on a better approach is not yet available practitioners should replace the current inappropriate approach with a variety of flexible ones that offer the opportunity to change with new knowledge

as cities undergo vast changes due to industrialization urbanization and globalization environmental considerations assume a growing importance in the urban planning processes of an increasing number of governments around the world several cities and regions around the world have already enacted policies that signal the emergence of a paradigm

the european landscape convention has introduced a europe wide concept of protection management and planning of all landscapes not just the outstanding ones this book reflects on the background to the establishment of the convention takes a critical look at examples and experiences of its implementation and discusses future developments for the convention and the management of landscapes in europe a decade after the creation of the european landscape convention this book asks how it has influenced the governance and development of european landscapes and what role it will play in the coming years the authors provide a wide range of analyses reflections and visions informed by their diverse experiences of researching working with and using the convention the sixteen essays are organised into three sections focusing on the fundamental concepts and values behind the convention current projects and experiences of implementation and prospects for future developments

landscape ecology has emerged in the past decade as an important and useful tool for land use planners and landscape architects while professionals and scholars have begun to incorporate aspects of this new field into their work there remains a need for a summary of key principles and how they might be applied in design and planning this volume fills that need it is a concise handbook that lists and illustrates key principles in the field presenting specific examples of how the principles can be applied in a range of scales and diverse types of landscapes around the world chapters cover patches size number and location edges and boundaries corridors and connectivity mosaics summaries of case studies from around the world
