this book is based on the theory that the black muslim movement was created from the
knowledge of the masonic order in the early decades of the 20th century noble drew ali
established a political and religious organization known today as the moorish science
temple of america it was this organization that exposed black to something other than the
normal christian influences of that day ali a high degree freemason incorporated various
masonic teachings from an auxiliary group known as the aeonoms ancient egyptian arabic
order of noble of the mystic shrine a pseudo islamic arabic oriental organization that
served as a wake up call to a lost knowledge a knowledge that was taken away from

africans during the slave trades the theory behind this book is that the majority of the slaves that were taken from the west coast of africa were practicing muslims and these muslims were forced to convert to christianity under the strong oppression of slavery at one time afro americans were the biggest minority in the american society about 90 of the todays population of blacks are descendants of slaves that were brought to america for working on plantations since the 16th century at the beginning of the 19th century most of the so called negroes lived in the plantation areas of the southern states after the civil war and the abolition of slavery it wasnt until the early 1920s and 30s that blacks were beginning to experiment with other faiths of all the faiths islam became the fastest growing religion and the most popular this book by far is in no way a research into black history instead it covers a more deeper aspect of history in which i call the history behind the history it explores the true asiatic origins of the ancient religions of hinduism buddhism well as the islamic faith finally it explores the masonic symbolisms of alis moorish science dogma digging deeper into the esoteric side of his aquarian masonic teaching explaining their origins and discovering an age old wisdom that had been kept hidden from the human eye one would think that africans in the americas would have rejected the religious tradition of their european oppressors taking into consideration that african religions are far older they possess more sources of knowledge spiritual salvation yet there are those who have turned away from traditional christian dominated environments in order to find a greater understanding of themselves and the world in which they live one alternative has been to seek knowledge in the various religious groups that arose in the 20th century

islam is the fastest growing religion in the united states there are more muslims in america than in kuwait qatar and libya together leaving aside immigration and conversion birthrate alone ensures that in the first part of the twenty first century islam will replace judaism as the nation s second largest religion like all religious minorities in america muslims must confront a host of difficult questions concerning faith and national identity can they become part of a pluralistic american society without sacrificing their identity can muslims be muslims in a state that is not governed by islamic law will the american legal system protect muslim religious and cultural differences is there a contradiction between demanding equal rights and insisting on maintaining a distinctively separate identity will the secular and or judeo christian values of american society inhibit the muslim practice of religious faith while the muslims of america are indeed on the path to americanization what that means and what that will yield remains uncertain in this thoughtful and wide ranging volume fourteen distinguished scholars take an in depth look at these issues and examine the varied responses and opinions of the muslim community
