praise for the first edition because of its exceptionally wide perspective even

architectural historians who do not teach general survey courses are likely to enjoy and appreciate it. Annali d'architettura not only does a global history of architecture, it owns the territory of world architecture. It pulls off this audacious task with panache, intelligence, and for the most part, grace. Journal of the Society of Architectural Historians revised and updated the compelling history of the world's great architectural achievements organized along a global timeline. A global history of architecture, second edition, has been updated and revised throughout to reflect current scholarship spanning from 3500 BCE to the present. This unique guide is written by an all-star team of architectural experts in their fields who emphasize the connections, contrasts, and influences of architectural movements throughout history. The architectural history of the world comes to life through a unified framework for interpreting and understanding architecture, supplemented by rich drawings from the renowned Frank Ching, as well as brilliant photographs. This new second edition delivers more coverage of non-Western areas, particularly Africa, South Asia, South East Asia, and Pre-Columbian America. It is completely re-designed with full-color illustrations throughout, incorporates additional drawings by Professor Ching, including new maps with more information and color, meets the requirements set by the National Architectural Accrediting Board (NAAB) for non-Western architecture in history education, offers new connections to a companion site including Google Earth™ coordinates for ease of finding sites. Architecture and art enthusiasts will find a global history of architecture, second edition, perpetually at their fingertips.

In a continuously running stream of events, the history of architecture pieces together humankind's building prowess from 10,000 BCE when humans began creating basic shelters from twigs and leaves through to the wondrous feats of today, visible in futuristic skyscrapers and towers of concrete, steel, and glass. It covers religious and secular architecture, including places of worship, royal buildings, forts, commercial complexes, bridges, industrial buildings, transportation hubs, and residences. Discover styles and sub-styles ranging across civilizations and geographies through biographies with great masters like Brunelleschi and Frank Lloyd Wright, whose works are considered landmarks of architectural achievement. A famous architect once said, ideally, all buildings should be visited; practically, impossible, as that is many of the more stupendous edifices can be visited through the pages of this book.

As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present, this book is an essential resource for architects, students, teachers, historians, and theorists. Using only original sources, Krutft has undertaken the monumental task of researching, organizing, and analyzing the significant statements put forth by architectural theorists over the last two thousand years. The result is a text that is authoritative and complete, easy to read without being reductive.

Originally published in 1848, according to the author, every person has an individual

interest in architecture as a useful art and all who cultivate a taste of the fine arts must give it a high place among them the chapters include examinations of many types of architecture such as egyptian persian and chinese as well as considering the principles of architecture the qualifications for an architect and the contemporary state of the art in america

this book provides a sketch of various periods and styles of architecture including a characterization of each in connection with its most important works reprint of the revised 1907 edition

the roman architect and engineer vitruvius declared firmitas utilitas and venustas firmness commodity and delight to be the three essential attributes of architecture these qualities are brilliantly explored in this book which uniquely comprises both a detailed survey of western architecture including pre columbian america and an introduction to architecture from the middle east india russia china and japan the text encourages readers to examine closely the pragmatic innovative and aesthetic attributes of buildings and to imagine how these would have been praised or criticized by contemporary observers artistic economic environmental political social and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients society at large and future generations

excerpt from a text book of the history of architecture the aim of this work has been to sketch the various periods and styles of architecture with the broadest possible strokes and to mention with such brief characterization as seemed permissible or necessary the most important works of each period or style extreme condensation in presenting the leading facts of architectural history has been necessary and much that would rightly claim place in a larger work has been omitted here the danger was felt to be rather in the direction of too much detail than of too little while the book is intended primarily to meet the special requirements of the college student those of the general reader have not been lost sight of the majority of the technical terms used are defined or explained in the context and the small remainder in a glossary at the end of the work extended criticism and minute description were out of the question and discussion of controverted points has been in consequence as far as possible avoided the illustrations have been carefully prepared with a view to elucidating the text rather than for pictorial effect with the exception of some fifteen cuts reproduced from lübke s geschichte der architektur by kind permission of messrs seemann of leipzig the illustrations are almost all entirely new about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the

presents a history of american architecture from the first civilizations in america to the present

a history of architecture is a record of man s efforts to build beautifully the erection of structures devoid of beauty is mere building a trade and not an art edifices in which strength and stability alone are sought and in designing which only utilitarian considerations have been followed are properly works of engineering only when the idea of beauty is added to that of use does a structure take its place among works of architecture we may then define architecture as the art which seeks to harmonize in a building the requirements of utility and of beauty it is the most useful of the fine arts and the noblest of the useful arts it touches the life of man at every point it is concerned not only in sheltering his person and ministering to his comfort but also in providing him with places for worship amusement and business with tombs memorials embellishments for his cities and other structures for the varied needs of a complex civilization it engages the services of a larger portion of the community and involves greater outlays of money than any other occupation except agriculture everyone at some point comes in contact with the work of the architect and from this universal contact architecture derives its significance as an index of the civilization of an age a race or a people

excerpt from history of architecture from the earliest times its present condition in europe and the united states with a biography of eminent architects and a glossary of architectural terms the perception of the beautiful is among the noblest of god s gifts to man when improved by culture it diffuses over the poor wants of human nature a glory like sunlight upon the dark and frozen earth the peasant of the genial south trains the jessamine over his rude porch and beneath it after the weary labour of the day enjoys the stilly eve the swiss mountaineer hangs his picturesque chalet amid the embowering trees of his native alps and its beauty delights the passing traveller with the same earnest longing for the beautiful the man of wealth calls in the aid of art to decorate his more lofty dwelling place but not alone the home of man must minister to his love of the beautiful the temple which he consecrates to the worship of his creator must rear its stately columns and spread its overarching vault to form a fit sanctuary for holy thoughts and heavenward aspirations about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are
