first multi year cumulation covers six years 1965 70

the proceedings of the sixth international congress on black sea antiquities constanta 2017 is dedicated to the 90th birthday of prof sir john boardman president of the congress since its inception the central theme returns to that considered 20 years earlier the importance of the pontic region for the graeco roman world

this volume summarizes the state of the art of variscan geology from iberia to the bohemian massif the european variscan belt consists of two orogens the older northern and the younger southern the northern variscan realm was dominated by late devonian carboniferous rifting subduction and collisional events as defined by sedimentary records crustal growth recycling of continental crust and large scale deformations in contrast the southern european crust was reworked by major late carboniferous collision

followed by permian wrenching the late carboniferous permian orogeny overprinted the previously accreted system in the north but with much lower intensity resulting in magmatic recycling and extensional tectonics these two main orogenic cycles do not reflect episodic evolution of a single orogenic system but a complete change in orientation of stress field thermal regime degree of reworking and recycling of european crust reflecting a major switch in plate configurations at the early late carboniferous boundary

this enormous undertaking which according to one of the prefaces professes to be a complete list of every bird known at the time of publication kept growing even as it was being written the museum added eagerly to their already vast collections during the decades of publication acquiring by gift the great collections of a o hume on asian birds and those of sclater and salvin and godwin on neotropical birds so that the size of the collection nearly tripled between 1874 and 1888 sharpe originally intended to do all the work himself but others were called in when this became clearly impossible the plates are all of birds not previously illustrated in the decades following its publication this catalogue was universally acclaimed as the most important work on systematic ornithology that has ever been published zimmer p 96 and even after one hundred years it remains an essential reference for the serious ornithologist as it underpins a great deal of modern bird classification with 387 plates most hand coloured lithographs some chromolithographs by william hart j g keulemans joseph and peter smit
