examining legal ethics within the framework of modern practice this book identifies two important ethical issues that all lawyers confront the difference between the role of lawyers and the role of judges in pursuing justice and the conflicting

responsibilities lawyers have to their clients and to the legal system more broadly in addressing these issues legal ethics provides an explanation of the duties and dilemmas common to practicing lawyers in modern legal systems throughout the world the authors focus their analysis on lawyers in independent practice in modern capitalist constitutional regimes including the united states japan europe and latin america as well as the emerging legal systems in china and the former soviet bloc to develop connections between the legal profession and political systems based on the rule of law they find that although ethical tension is inherent in the legal practice of all these societies the legal profession is essential to stable political institutions

ethics and regulation have become catchwords of the late 1990s yet relatively little has been written about the ethical discourse and regulation of the legal professions in england and wales this book represents the first attempt to subject the ethical discourse of the english legal professions to in depth analysis and sustained critique drawing on insights from moral philosophy social theory the sociology of the legal profession public law theories of regulation and the extensive american literature on lawyers ethics it argues that in seeking to provide definitive answers to particular problems of professional conduct professional legal ethics has failed to deliver an approach which requires lawyers actively to engage with the ethical issues raised by legal practice through an analysis of the core issues facing lawyers the authors locate this failure in the profession s reliance on a liberal and adversarial role morality that conceptualises the ethical values of human dignity autonomy and equality in a formalistic and narrowly legalistic manner this encourages lawyers to overlook the real invasions of these values so often wrought by upholding clients legal rights and to ignore the competing claims of affected third parties the wider community and the environment in seeking to move beyond critique the authors develop throughout the book a contextual approach to individual ethical decision making and outline a range of institutional regulatory and educational reforms which they suggest could form the basis for a more ethical brand of professionalism professional legal ethics critical interrogations is a wide ranging and thought provoking analysis written for lawyers ethicists and policy makers interested in this neglected area of professional ethics and regulation

a conflict arises in the clinic over the care of a critically ill incapacitated patient the clinicians and the patient s family confront a difficult choice to treat or not to treat decisions to withdraw or withhold life sustaining treatment feature frequently in the courts and in the world s media with prominent examples including the cases of charlotte wyatt in the uk and terri schiavo in the usa according to legislation like the mental capacity act 2005 the central issues are the welfare or best interests of the patient alongside any wishes they might have conveyed via an advance directive or through the appointment of a lasting power of attorney richard huxtable argues that the law governing both welfare and

wishes frequently fails to furnish clinicians and families with the guidance they require however he finds this unsurprising given the competing ethical issues at stake huxtable proposes that there is a case for principled compromise here such that the processes for resolving principled disputes take precedence he argues for greater ethical engagement through a reinvigorated system of clinical ethics support in which committees work alongside the courts to resolve the conflicts that can arise at the limits of life providing a comprehensive account of the law pertaining to children and adults alike and distinctively combining medico legal and bioethical insights this book engages scholars and students from both disciplines as well as informing clinicians about the scope and limits of law at the limits of life

among members of the legal profession and judiciary throughout the world there is a genuine concern with establishing and maintaining high ethical standards it is not difficult to understand why this should be so nor is it difficult to see the professional standards are not completely divorced from ordinary morality indeed legal ethics and professional responsibility are more than a set of rules of good conduct they are also a commitment to honesty integrity and service in the practice of law in order to ensure that the standards established are the right ones it is necessary first of all to examine important philosophical and policy issues such as the need to reconsider the boundaries between on the one hand a lawyer's obligation to a client and on the other the public interest it is also to be appreciated that conflicts of interest are pervasive and that all too often they are so common that they are not recognized as such yet rarely is public policy clearly cut the underlying themes of this book are that the move to more definite rules is not only inevitable but also desirable that existing codes of professional practice cannot simply be treated as a system of specific rules that the current set of ethical rules is contestable and requires further refinement perhaps even radical surgery and that legal ethics must be conceived in the more general area of professional responsibility the wider ethical issues of the operation of the legal profession as a whole are now firmly on the agenda both law schools and law professionals have a role to play in developing acceptable standards in this area and it is therefore appropriate that the essays in this volume are written by a distinguished group of law teachers and practitioners together with senior members of the judiciary the book opens with an overview chapter followed by three chapters analysing the ethical rules pertaining to the judiciary the bar and solicitors written by respectively the master of the rolls anthony thornton and alison crawley and christopher bramall the following three chapters look at the specific issues of confidentiality michael brindle and guy dehn and the particular ethical problems in the family and criminal law jurisdictions sir alan ward and professor andrew ashworth respectively

chapter 8 by sir alan paterson discusses the teaching of legal ethics whilst chapters 9 and 10 by marc galanter thomas palay and cyril glasser put the subject in its wider social and professional context the book finishes with a chapter which examines what lawyers may learn from looking at the study of medical ethics
