this volume looks at the history and legends of various mythical creatures

vampires and werewolves
phantoms and phantasms
looming out of the fog
leaps the menacing spectre of the lycanthrope
ghoul or blood crazed zombie
intrigued by some of the most sinister yet at the same time most compelling legends of western civilization
gregory l reece
dusts down his stake and crucifix
loads his silver bullets and takes off into the wilds in search of answers and fresh adventures
rummaging around in crumbling tombs and cobwebbed sarcophagi
his latest quest leads him into the haunted realm of the dead and the undead
of those carnivorous nocturnal hunters that might perhaps better be left undisturbed
why he asks is our culture obsessed by the eerie and the macabre
why despite its horrors does the dark side of the supernatural
its seances and ghost hunting
demonic possession and the occult
call to us with such dangerous allure
whether tracking night stalking werewolves
chanting black magic mantras with satanists or interviewing a funereal modern day count dracula
reece is determined to uncover the truth
a wry exploration of a secret and secretive subculture
creatures of the night is at the same time a bold and startling journey into a wraithlike world that has so often seemed to lie beyond the limits of rational comprehension until now

life is one of our most basic concepts and yet when examined directly it proves remarkably contradictory and elusive encompassing both the broadest and the most specific phenomena we can see this uncertainty about life in our habit of approaching it as something at once scientific and mystical in the return of vitalisms of all types and in the pervasive politicization of life in short life seems everywhere at stake and yet is nowhere the same in after life eugene thacker clears the ground for a new philosophy of life by recovering the twists and turns in its philosophical history beginning with aristotle s originary formulation of a philosophy of life thacker examines the influence of aristotle s ideas in medieval and early modern thought leading him to the work of immanuel kant who notes the inherently contradictory nature of life in itself along the way thacker shows how early modern philosophy s engagement with the problem of life affects thinkers such as gilles deleuze georges bataille and alain badiou as well as contemporary developments in the speculative turn in philosophy at a time when life is categorized measured and exploited in a variety of ways after life invites us to delve deeper into the contours and contradictions of the age old question what is life
