crucial to fill these gaps **Rapid Species Discovery** New beetle species are continuously being discovered requiring constant updates and revisions to the catalog This underscores the dynamic nature of biodiversity and the need for ongoing taxonomic research **Data Accessibility and Integration** Making the catalogs data readily accessible and integrating it with other biodiversity databases is essential for maximizing its impact The use of opensource platforms and standardized data formats can greatly facilitate this process **The Role of Technology** Emerging technologies are transforming the way the CCoANM is utilized and maintained DNA barcoding highthroughput sequencing and advanced imaging techniques are significantly accelerating species identification and phylogenetic analysis The integration of these technologies into the catalog promises to enhance its accuracy comprehensiveness and accessibility

3 A Call to Action The Catalog of the Coleoptera of America North of Mexico is a critical resource for understanding managing and conserving biodiversity Its continued development and accessibility require collaborative efforts from researchers policymakers and the public We need increased investment in taxonomic research the development of userfriendly interfaces for accessing the catalogs data and enhanced international collaboration to address the challenges outlined above By supporting entomological research and promoting the use of the CCoANM we can contribute to a more sustainable and biodiverse future

5 ThoughtProvoking FAQs
