james b conant 1893 1978 was one of the giants of the american establishment in the twentieth century president of harvard university from 1933 to 1953 he was also a scientist who led the us government s effort to develop weapons of mass destruction and his story mirrors the transition of the united states from isolationism to global superpower at the dawn of the nuclear age this splendid portrait of conant illuminates the life of a pivotal figure in the making of us nuclear scientific educational and foreign policy for almost half a century but the book is much more it is not only an insightful narration of conant s life it is also a brilliant and important account of the making of the nuclear age a chronicle that contains much that is new the washington post the bomb would be as much conant s as it was anyone s in government his inner response to that burden of responsibility has long been obscured but it is illuminated here this is a model of historiography that is evocative reading the new york times book review vibrantly written and compelling it breaches conant s shield of public discretion in masterly fashion
