this book is an introduction to the geometry of complex algebraic varieties it is intended for students who have learned algebra analysis and topology as taught in standard undergraduate courses so it is a suitable text for a beginning graduate course or an advanced undergraduate course the book begins with a study of plane algebraic curves then introduces affine and projective varieties going on to dimension and constructibility mathematical modules quasicoherent sheaves are defined without reference to sheaf theory and their cohomology is defined axiomatically the riemann roch theorem for curves is proved using projection to the projective line some of the points that aren't always treated in beginning courses are hensel's lemma chevalley's finiteness theorem and the birkhoff grothendieck theorem the book contains extensive discussions of finite group actions lines in \mathbb{P}^3 and double planes and it ends with applications of the riemann roch theorem

the papers in this volume are based on the talks given at the conference on quantum groups dedicated to the memory of joseph donin which was held at the technion institute haifa israel in july 2004 a survey of donin's distinguished mathematical career is included several articles which were directly influenced by the research of donin and his colleagues deal with invariant quantization dynamical r matrices poisson homogeneous spaces and reflection equation algebras the topics of other articles include hecke symmetries orbifolds set theoretic solutions to the pentagon equations representations of quantum current algebras unipotent crystals the springer resolution the fourier transform on hopf algebras and as a change of pace the combinatorics of smoothly knotted surfaces the articles all contain important new contributions to their respective areas and will be of great interest to graduate students and research mathematicians interested in hopf algebras quantum groups and applications information for our distributors this book is copublished with bar ilan university ramat gan israel
